ALBERT – dries out!

Rotary control for easy operation

24h On- and off-timer

Tank with automatic handle

Swing mode: for equal distribution of dehumidified air

Hose for permanent dehumidification

Where humid rooms are a nightmare, Albert feels right at home! On the ground floor or in the basement, in the house by the water or even in the laundry, Albert is an efficient dehumidifier: the swing function of the air outlet ensures optimal air distribution, particularly helpful for dehumidifying a large room. Albert also features a unique 24 hour timer that lets you select the desired on- and off-time to the minute, and therefore benefit from different electricity rates.
