What some of our customers are saying

We always attempt to maintain and provide new products and information that enhance and perfect the fencing industry. Postsaver and Fence Armor fall in that category. We've started to use Postsaver on some of our Accu-Steel Fabric Covered Buildings, easy-to-use and great warranty.

Clint Iams - Log Cabin Fence
(Amity, PA)

Yorkshire Fence & Deck is a local Maple Ridge business offering various fence and deck solutions to lower mainland, BC. We use Fence Armor and Postsaver on all our customers' fence projects to protect them from rot and weed whacker damage. You can't beat the 20-year warranty and great curb appeal they offer our customers.

Andy Solk - Yorkshire Fence & Deck
(Vancouver, BC)

Our business is to help you protect your fence and deck, to make it last longer, and to keep it looking its best for years to come. To that end we use Postsaver on our pre-stained lumber to give it that long term protection that it needs in the ground, where rot and termites eat away at them.

Caleb Roth - Stain and Seal Experts
(Nashville, TN)

Postsaver Sleeves Extending Fence & Gate Post Life Since 1994

Postsaver Sleeves Have Been Extending Wooden Fence Post Life Since 1994

Millions
sold!

Postsaver guarantees your fence posts for 20 years by preventing ground line rot and decay in the upper 6" of the post

Low Cost

Save Time
Money & Hassle

Postsaver is a heat shrinkable, thermoplastic sleeve lined with a bituminous sealant. By applying the sleeve prior to post installation, it creates a long lasting air and water tight seal in the ground line section of the post, making conventional ground rot impossible.

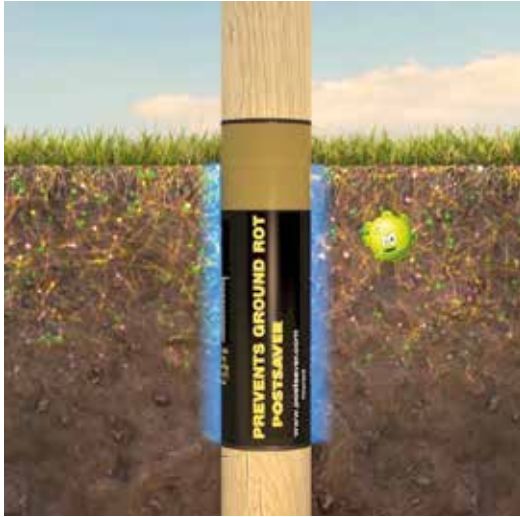

Postsaver Sleeves work by keeping fungi, moisture, oxygen and termites out – All natural causes of wood decay.

The Problem

Posts rot at the ground line because conditions for decay are ideal at this point. Nature's own natural waste disposal system for wood and leaves also happens to like eating your posts.

The Solution

Adding extra protection at the ground line section of the post prevents this problem. Deeper in the ground it is too cold and there is not enough oxygen for the decaying organisms to thrive.

Sleeves are quick and easy to apply using a blow torch, simply heat shrink the sleeve onto the post prior to installation.

We supply a range of torches to suit all budgets and quantities.
