EB-L200SX

112 / 50	LASER	WiFi® Miracast	2x HDMI
XGA	16 W		3600 lm
2,500,000:1			

KEY FEATURES

Versatile laser display solution for delivering high-quality content to a large scalable screen with wireless or wired connectivity options

Whatever the size of workspace, unrestricted and immersive presentations are now possible with this compact, affordable display solution. Due to a large display size, and flexible formats, content can be viewed from every angle, and participants can share directly from their own devices, for the perfect collaborative experience.

With the EB-L200SX, users are no longer restricted to a single display size, with bright, large scalable options up to 112". Unlike flat-panel equivalents, there are no shadows, glare or blind spots, and the 3,600lm high-brightness laser light source can work when ambient lighting is also high. Multi-screen capability makes collaboration easy and intuitive, while a split-screen feature can show up to four inputs in one large display at XGA resolution.

The viewing experience is more immersive, with multiple connectivity options enhancing exceptional image and built-in speaker sound quality. By connecting an optional Epson document camera you can easily display live images of 3D objects with incredible detail that the whole room can see.

For the ultimate in engagement; wireless connectivity (including Screen Mirroring via Miracast) allows everyone to share content from their tablets, mobiles or laptops.

Sustainability is another strength, based on sustainable manufacturing, product usage and lifecycle.
