

Auto factories worldwide use U-Mark temporary markers to identify work-in-process parts and inventory, or to mark re-work items. Auto dealers, auctioneers and repair shops use them to advertise products or for marking on vehicle parts. Tips and paints have been designed to work on difficult surfaces without affecting removability or the surface being marked.

Washoff Water Removable Paint Marker

10451	● Black
10452	● Blue
10453	● Green
10454	● Red
10455	○ White
10456	● Yellow
12000	Repl. Tip for Black, Blue, Green, Red
13101	Repl. Tip for White and Yellow

- Can be used on wet and oily metal surfaces in assembly, stamping and metal fabrication.
- Marks are removable in a water bath and do not leave a halo.
- 30% more paint for longer mileage.

EZ Off Wet Erase Industrial Marker

- Wet erase ink is removable from metals and glass with a damp cloth, without leaving a halo.
- Marks are highly visible and easily removable.
- For use in assembly plants, Q.C. operations, repair shops and metal fabrication.
