2ml Saliva To Unlock Your DNA Puzzle

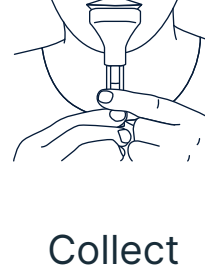

Free Report Updates

Step 1:

Order SHINE DNA

Step 2:

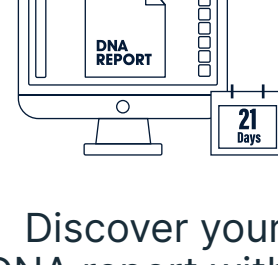

Collect saliva sample

Step 3:

Return sample

Step 4:

Discover your DNA report within 21 working days

FAQ

Q: How does this work?

We will ship out the DNA test kit within 24 hours after order is confirmed. All you need to do is collect saliva according to the Quick Start Guide and send it back to us.

Q: How long does it take to get the results?

21 working days after the lab has received the sample. Results will be sent out via email.

Q: Why choose to test with us?

The genetic samples are sent to our International Professional and Quality Certified laboratories for collection and analysis. It's also certified with international ISO 9001, ISO 17025, GCLP, CAP and CLIA. We have the world's largest Asian gene bank, which guarantees 99.9% accuracy of test results.

Q: How can I protect my privacy?

We will never share your data with third parties without your consent. We use modern technology and follow industry standards to ensure that your information is protected.

Q: Can a baby perform DNA test?

Theoretically, a baby can perform a DNA test as genetic testing is not age specific. However, it might be slightly difficult to perform as they're too young; hence, it is recommended to do it after 3 years old. Please note that if the baby's saliva can meet the collection requirements, the test can be done at anytime.
