

## FRONT SPLITTER

<b>Package Includes:</b> 1 x Front Splitter Self-tapping screws	<b>Tools Needed:</b> 8mm socket, PH1 with electric screwdriver	<b>Recommended number of person:</b> 2
---	---	---

### How to fit the Front Splitter?

#### 1. Preparing Your Vehicle

- Jack up your car to provide enough clearance for drilling and installation. Ensure the vehicle is securely supported before proceeding.

#### 2. Positioning the Splitter

- Remove the front left, right, and middle under-trays to access the area where the splitter will be installed.
- Every splitter is designed to fit in a certain position on your bumper. Line up the splitter to the bumper's bottom. Level splitter edges with the bumper edges, near the wheels on both sides. (this fitting should be done by two individuals) We recommend taking extra time and care during this step.

#### 3. Fitting the Splitter

- Once the splitter is in the correct position, locate the pre-drilled holes and use the self-tapping screws to fix the splitter to the bumper. Make sure all the provided screws have been used for the most secure fit.
- You need to use polyethylene glue if the gap between the splitter's edge adjoining bumper and drilled hole is more than 3cm. Glue needs to dry for a minimum 24h before driving.

---

## 4. Securing the Splitter

- a. Drill Additional Holes if necessary. If additional holes are needed, use a 6.5mm drill bit to drill one hole in the middle of the bumper (through the splitter) and one hole on each side.
- b. Insert bolts through the holes from the bottom, and hold the nuts with a spanner to tighten. This ensures the splitter is flush with the bumper.
- c. Reinstall Under-Trays and ensure that all components are securely fastened.

## 5. Aftercare

- a. We recommend using only shampoos and mild waxes or polishes on our product. Chemicals with acidic properties may damage the finish and adhesive.

**Please note that these instructions are intended for guidance purposes only. It is your responsibility to ensure that the installation is performed safely and correctly. We highly recommend having a professional handle the installation of all our items.**
