'No Glaze' Protective Coating

Some pieces of art look more authentic to the original when framed with no glazing at all. To help protect the surface of the print when a frame is not glazed, we apply a water based UV protection varnish to the surface of the print before it is framed. The beautiful, very low sheen finish has the added benefit of having no reflections so the art can be viewed clearly from all angles. The finish also means your artwork can be gently cleaned with a soft cloth.

'True Colour' Perspex Glazing

Traditional picture framing glass has a slight green tint to it due to the iron oxide used in the manufacturing process. The Cast Perspex® we use is optically clear and introduces no colour casts, which would change the appearance of the artwork. Cast acrylic offers amazing clarity and very high UV protection properties, as well as being lighter than glass and safer to transport. The acrylic we use is also 100% recycled.

HAND CRAFTED. HAND PAINTED.

Perfect Match

The paint colours for our frames are chosen to complement each print. We use well known paint brands and our own coloured waxes to create frames which work perfectly with today's interiors.

FOR YOU AND PAINTED
