

The Flexsize Adjustable Clasp

The unique Flexsize Clasp technology is the first **resizable** magnetic **clasp** for bracelets, necklaces, and similar articles of precious, semi-precious or fashion jewellery.

With this technology our bracelets can be resized in 3 quick and easy steps and at home. Each bracelet comes with everything you need to do this, all in a matter of seconds, and then can be worn in a quick and easy way with a magnetic clasp. So easy, so fast, no fuss!

See our step-by-step method shown below:

Step 1:

Pull your bracelet open (always do this while holding the stainless-steel parts not the leather parts, to not affect the glue bond between the leather and steel).

Step 2:

Take your free mini screwdriver, open the side matching the screw, and **unscrew the small screw half way**

Step 3:

Slide along to your desirable size (3 sizes are available 19, 20 and 21cm). **Tighten the screw back**, make sure it is completely screwed back.

Put on your bracelet and in 3 easy steps you never have to worry about size when you shop for bracelets again, for yourself or for a gift!
