

RSV-1

EXOTIC & SMALL ANIMAL VENTILATOR

The RWD "RSV-1 Exotic & Small Animal Ventilator" is applicable to mechanical ventilation of reptiles, birds, cats, and small mammals within 12 kg. It requires only setting airway pressure and respiratory rate to provide safe mechanical ventilation for animals.

Features

- Provide safe and efficient Intermittent Positive Pressure Ventilation (IPPV).
- Set value of respiratory rate directly.
- Support one-button switching between spontaneous breathing and IPPV.
- Indicate airway pressure by real-time graphics.
- Display respiratory rate, I:E ratio, inhalation time and exhalation time by real time.
- Adopt separated structure between controller and operation, which makes usage more flexible.
- Verify I:E ratio by changing gas flow.
- Built in alarm parameters to monitor breathing status by real time.

Specification

Provides intermittent pressure ventilation (IPPV) to reptiles, birds, cats and small animals.

Air way pressure : 1-60cm H2O.

Respiratory rate : 1-120 bpm.

Spontaneous and IPPV switch.

Real-time graphics of air way pressure.

Abnormal breathing status alarm.

Work Pattern: IPPV.

Weight: 1.4kg.

Airway Pressure: 1-60cmH2O

Respiratory rate: 1-120bpm

Patient weight range <12kg.

Screen 2.8inch, 320*240px.

Power Supply: AC power: 100V~240V, 50 / 60Hz, 1.5A | DC power: 24V

Included

- RSV-1 RSV Small Animal Ventilator
- RSV-ET Exhaust Tube
- RSV-EK Extension Kit
- RSV-GS Gas Supply Hose
- RSV-LDS Low Dead Space Kit
