

# **5** Seconds™

## **5 Seconds™ 1SBR900 High Speed Automatic Strapping Machine**

# Description

1SBR900 High Speed Automatic Strapping Machine is an excellent strapper for a broad range of applications. At 65 straps per minute, the SM65 is lightning fast. The state of the art strapping head has 30% fewer parts than comparable strapping machines, and utilizes brushless DC motors. The result is a high speed strapping machine that consumes less power, requires fewer adjustments, and minimal maintenance.

## FEATURE

- Patented Easy Strap Access - Access to the strapping channel requires no tools
- Quick Coil Change - Strap is changed at waist height and automatically fed, no more crawling on the floor
- One Piece Strap Track - Track design eliminates dusting and guarantees parallel straps
- Sensor Controlled Heater - Heat seals are consistent and highly reliable
- Jam Free Technology - Missed straps are ejected and the SM65 returns to the ready position
- Foot Bar Switch - Provides "hands free" operation
- Photocell Activation - Several options can be programmed when this feature is activated
- Pivoting Control Panel - Allows the operator to access the control panel from either side of the machine
- Machines 33.46 and wider have standard roller tables
- Machines set for 0.47" strap have external strap reel

# Main Parameters of Machine

SKU #	999203
Strapping tension	40-600N Adjustable
Strapping speed	2.18Sec./Strap
Strap width	9、12、15mm
Power supply	110V/50-60Hz 0.5KVA
Arch size	31.4x23.6 Inches
Machine size	43.3 x 23.6 x 60.6 Inches (LxWxH)
Machine Weight	396.8lbs

## Dimension
