Household  
Disinfectant Generator

Disinfects  
Cleans  
Sanitizes  
Deodorizes

## Product Manual

# Whats Included

1 x My Clean Buddy Jr. 1 x usb charging cord 1 x scooper

## Product Overview

My Clean Buddy Jr can produce 500mg/l of disinfectant which can quickly and effectively kill: E. Coli, Staphylococcus aureus, Candida albicans, and many more germs and bacteria! It's safe, environmentally friendly, and a great alternative disinfectant.

## Maintenance

1. Do not place bottle close to any heat sources.
2. Do not place the My Clean Buddy into water.
3. After solution is created unplug the power cord from the device.
4. Although bleaching is an uncommon occurrence, we still do not recommend use on leather or silk goods.

## How to use

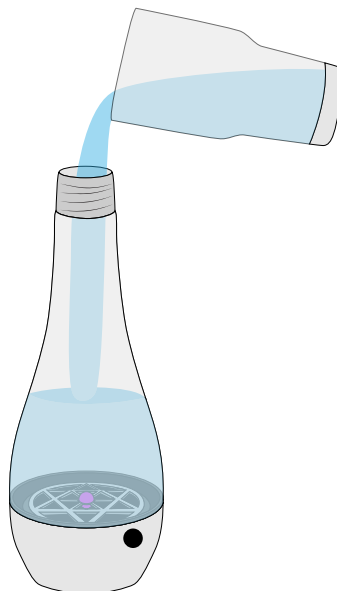

Spray, let soak for 10 seconds, then wipe clean with rag or paper towel.

## Instructions for use

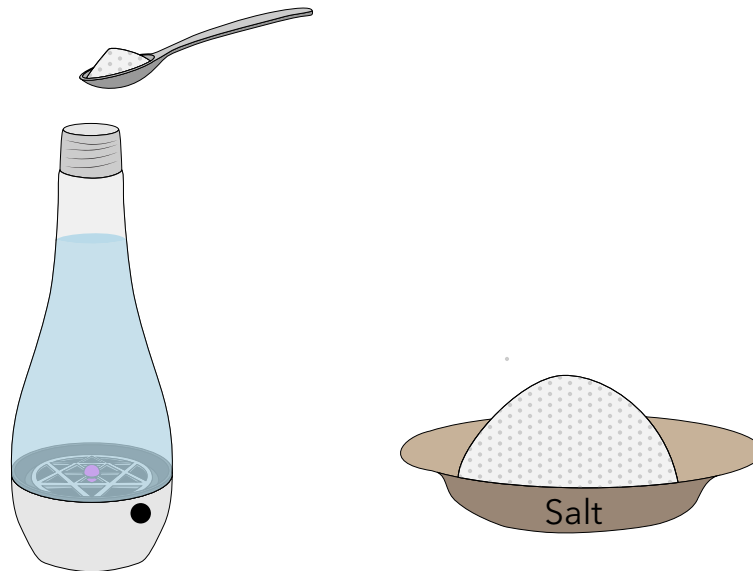

*Use a flat surface to ensure safety. Connect to power.*

- **Sanitizing Mode** (recommended for use with the My Clean Buddy)

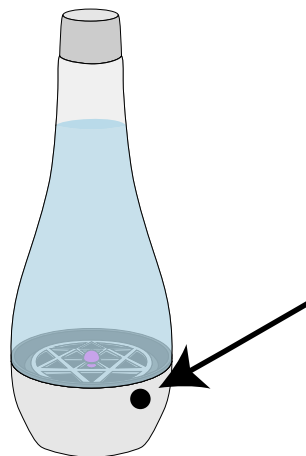

- 1) Fill the My Clean Buddy Jr with 400ml of distilled water (—MAX line).

2) Add 1 table spoon of table salt (approximately 15-20g of salt).

3) Press the power button on the My Clean Buddy Jr; the light will turn blue .  
(Signifying the start of the solution making process).

4) After 5 minutes, a beep will signify the end of the process.

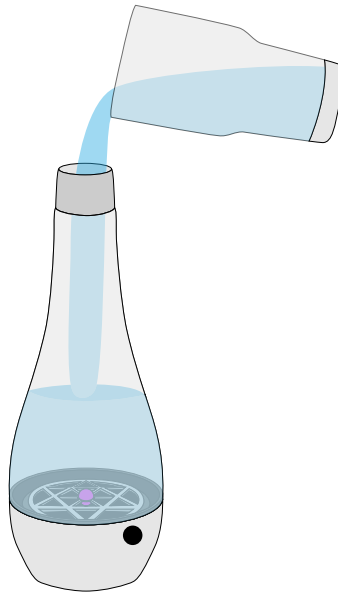

5) At this point you can pour 1 tbsp of solution into your My Clean Buddy fogger for a powerful disinfecting mist or you can spray directly from the My Clean Buddy Jr with the spray lid. *Remember to dilute the solution when using with My Clean Buddy Fogger at a ratio of 1 part disinfectant and 20 parts distilled water.*

6) Once finished with use; you can empty the solution maker and flush with water, or store the solution created. (Storing up to 1 week is recommended)

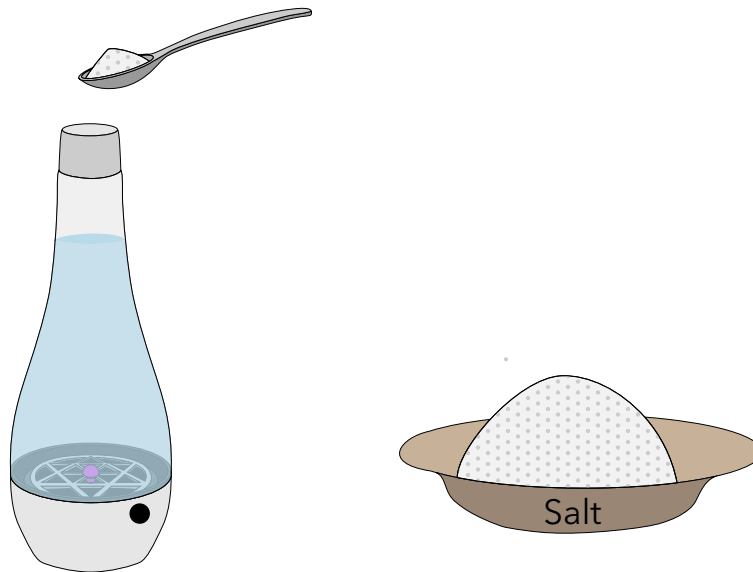

*Use a flat surface to ensure safety. Connect to power.*

- **Degreaser Mode** (Recommended for tougher jobs. Do not use on My Clean Buddy Fogger )

1) Fill the My Clean Buddy Jr with 400ml of distilled water (to —MAX line).

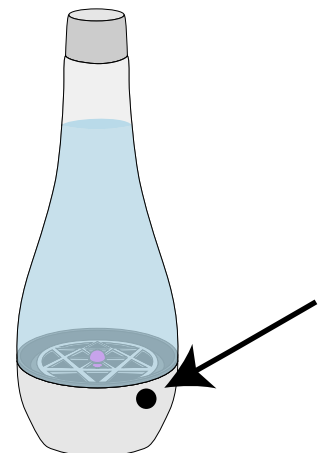

2) Add 1 table spoon of table salt (approximately 15-20g of salt).

3) Press the power button twice on the My Clean Buddy Jr; the light will turn purple (signifying the start of the solution making process).

4) After 10 minutes a beep will signify the end of the process.

5) At this point you can attach the spray attachment and begin spraying surfaces. (Remember to wipe after use).

6) Once finished with use; you can empty the solution maker and flush with water, or store the solution created. (Storing up to 1 week is recommended)

## **Tips**

Pressure is generated during the preparation of the solution making process. DO NOT tighten the spray lid to the bottle while the solution making process is active. Leave the bottle open. The force generated will be high and may damage the unit.

## **Lighting Tips**

Blue Light (Sanitize) Production takes 5 minutes

Purple Light (Degreaser) Production takes 10 minutes

Red Light - Charging

Green Light - Full charge

## **Precautions**

- ◆ When using for the first time after a prolonged storage time, clean thoroughly before use.
- ◆ This product is for both home and commercial use. Failure to follow the instructions may cause a failure in the device and may lead to a voided warranty.
- ◆ To prevent electrical issues and avoid dangerous instances, do not submerge the My Clean Buddy Jr and its power cord into water.
- ◆ DO NOT insert or remove plug with wet hands.
- ◆ If the power cord is damaged it must be replaced.
- ◆ Please read the manual thoroughly before use.
