# KYND

A NEW GENERATION OF  
ECOLUXE APPAREL

KYND is a sustainable label transforming discarded materials such as ocean plastic to create premium apparel designed to last.

The idea behind KYND is simple: craft high-quality pieces made from regenerated waste that would otherwise pollute the Earth, and re-distribute 10% of proceeds to environmental non-profits.

Our vision is to inspire modern, conscious women to make a difference through what they wear every day. Each piece we design is a catalyst for change that creates a better future for the planet, while celebrating conscious women.
