

Mimosa Floor Lamp

The Mimosa Floor Lamp was inspired by neurons, with an organic yet contemporary shape. The shades are made from a laser-cut, galvanized metal structure sprayed with a clear polymer. The result is a white membrane that perfectly distributes light. The sturdy base meanwhile is

made from robust grey concrete. Our Mimosa shades are constructed by hand, allowing some variation to occur from piece to piece – a truly one-off lighting design fixture. Our entire Mimosa Family can be customized to fit any size space.
