Sensitive Galvanometer

Part Number – 01SM1102

SPECIFICATIONS :-

Designed to measure weak current or the potential difference in DC circuit. It may be used in experiments on bridge measurement, thermocouple, electro-magnetic induction and photoelectric effect etc.

1. Range: $-300\mu\text{A}$ to $300\mu\text{A}$
2. Internal Resistance: $80-125\ \text{ohm}$ / $2.4-3\text{K}$
3. Weight: 0.35 lb.
