Soldering Station With Digital Display

Part Number - 0603ZD929C

Specifications :-

- Versatile 48W soldering station is suitable for a wide range of soldering tasks, ideal for delicate electronic work.
- Long-life ceramic element for rapid heating.
- Electronically controlled temperature with LED display.
- Include base, soldering iron, cable, built-in stand and sponge holder.
- 48W temperature controlled soldering station with adjustable range from 160°C to 480 °C.
- Temperature sensor located near tip allows rapid response.
- Tip temperature can be changed from 320 degrees F to 900 degrees F.
- LED temperature display.
- Heating element 24V AC; 48W
- Detachable soldering iron
