PRODUCT CARE

- Use a duvet cover for best long term care.
- Regular sunning and airing will naturally revitalize and disinfect your comforter while the duvet cover is in the wash.
- You may spot clean the cotton cover with a soft brush and mild detergent, allowing it to air dry completely before putting it back into the duvet cover.
- The comforter can be machine washed in cold water on the wool or delicate cycle without agitation. Use an approved wool detergent. Do not spin. Air dry or tumble dry on low heat. Do not bleach or iron.
- We do not recommend frequent washing, as the wool batting can separate inside the quilted pockets.
- For major stains that get through the duvet cover and comforter cover, we recommend eco-friendly dry cleaning on a short cycle with limited moisture.
