

 **iKLAS**  
TOUCH SERIES

## Exclusive Features

### Transaction reports at your fingertips

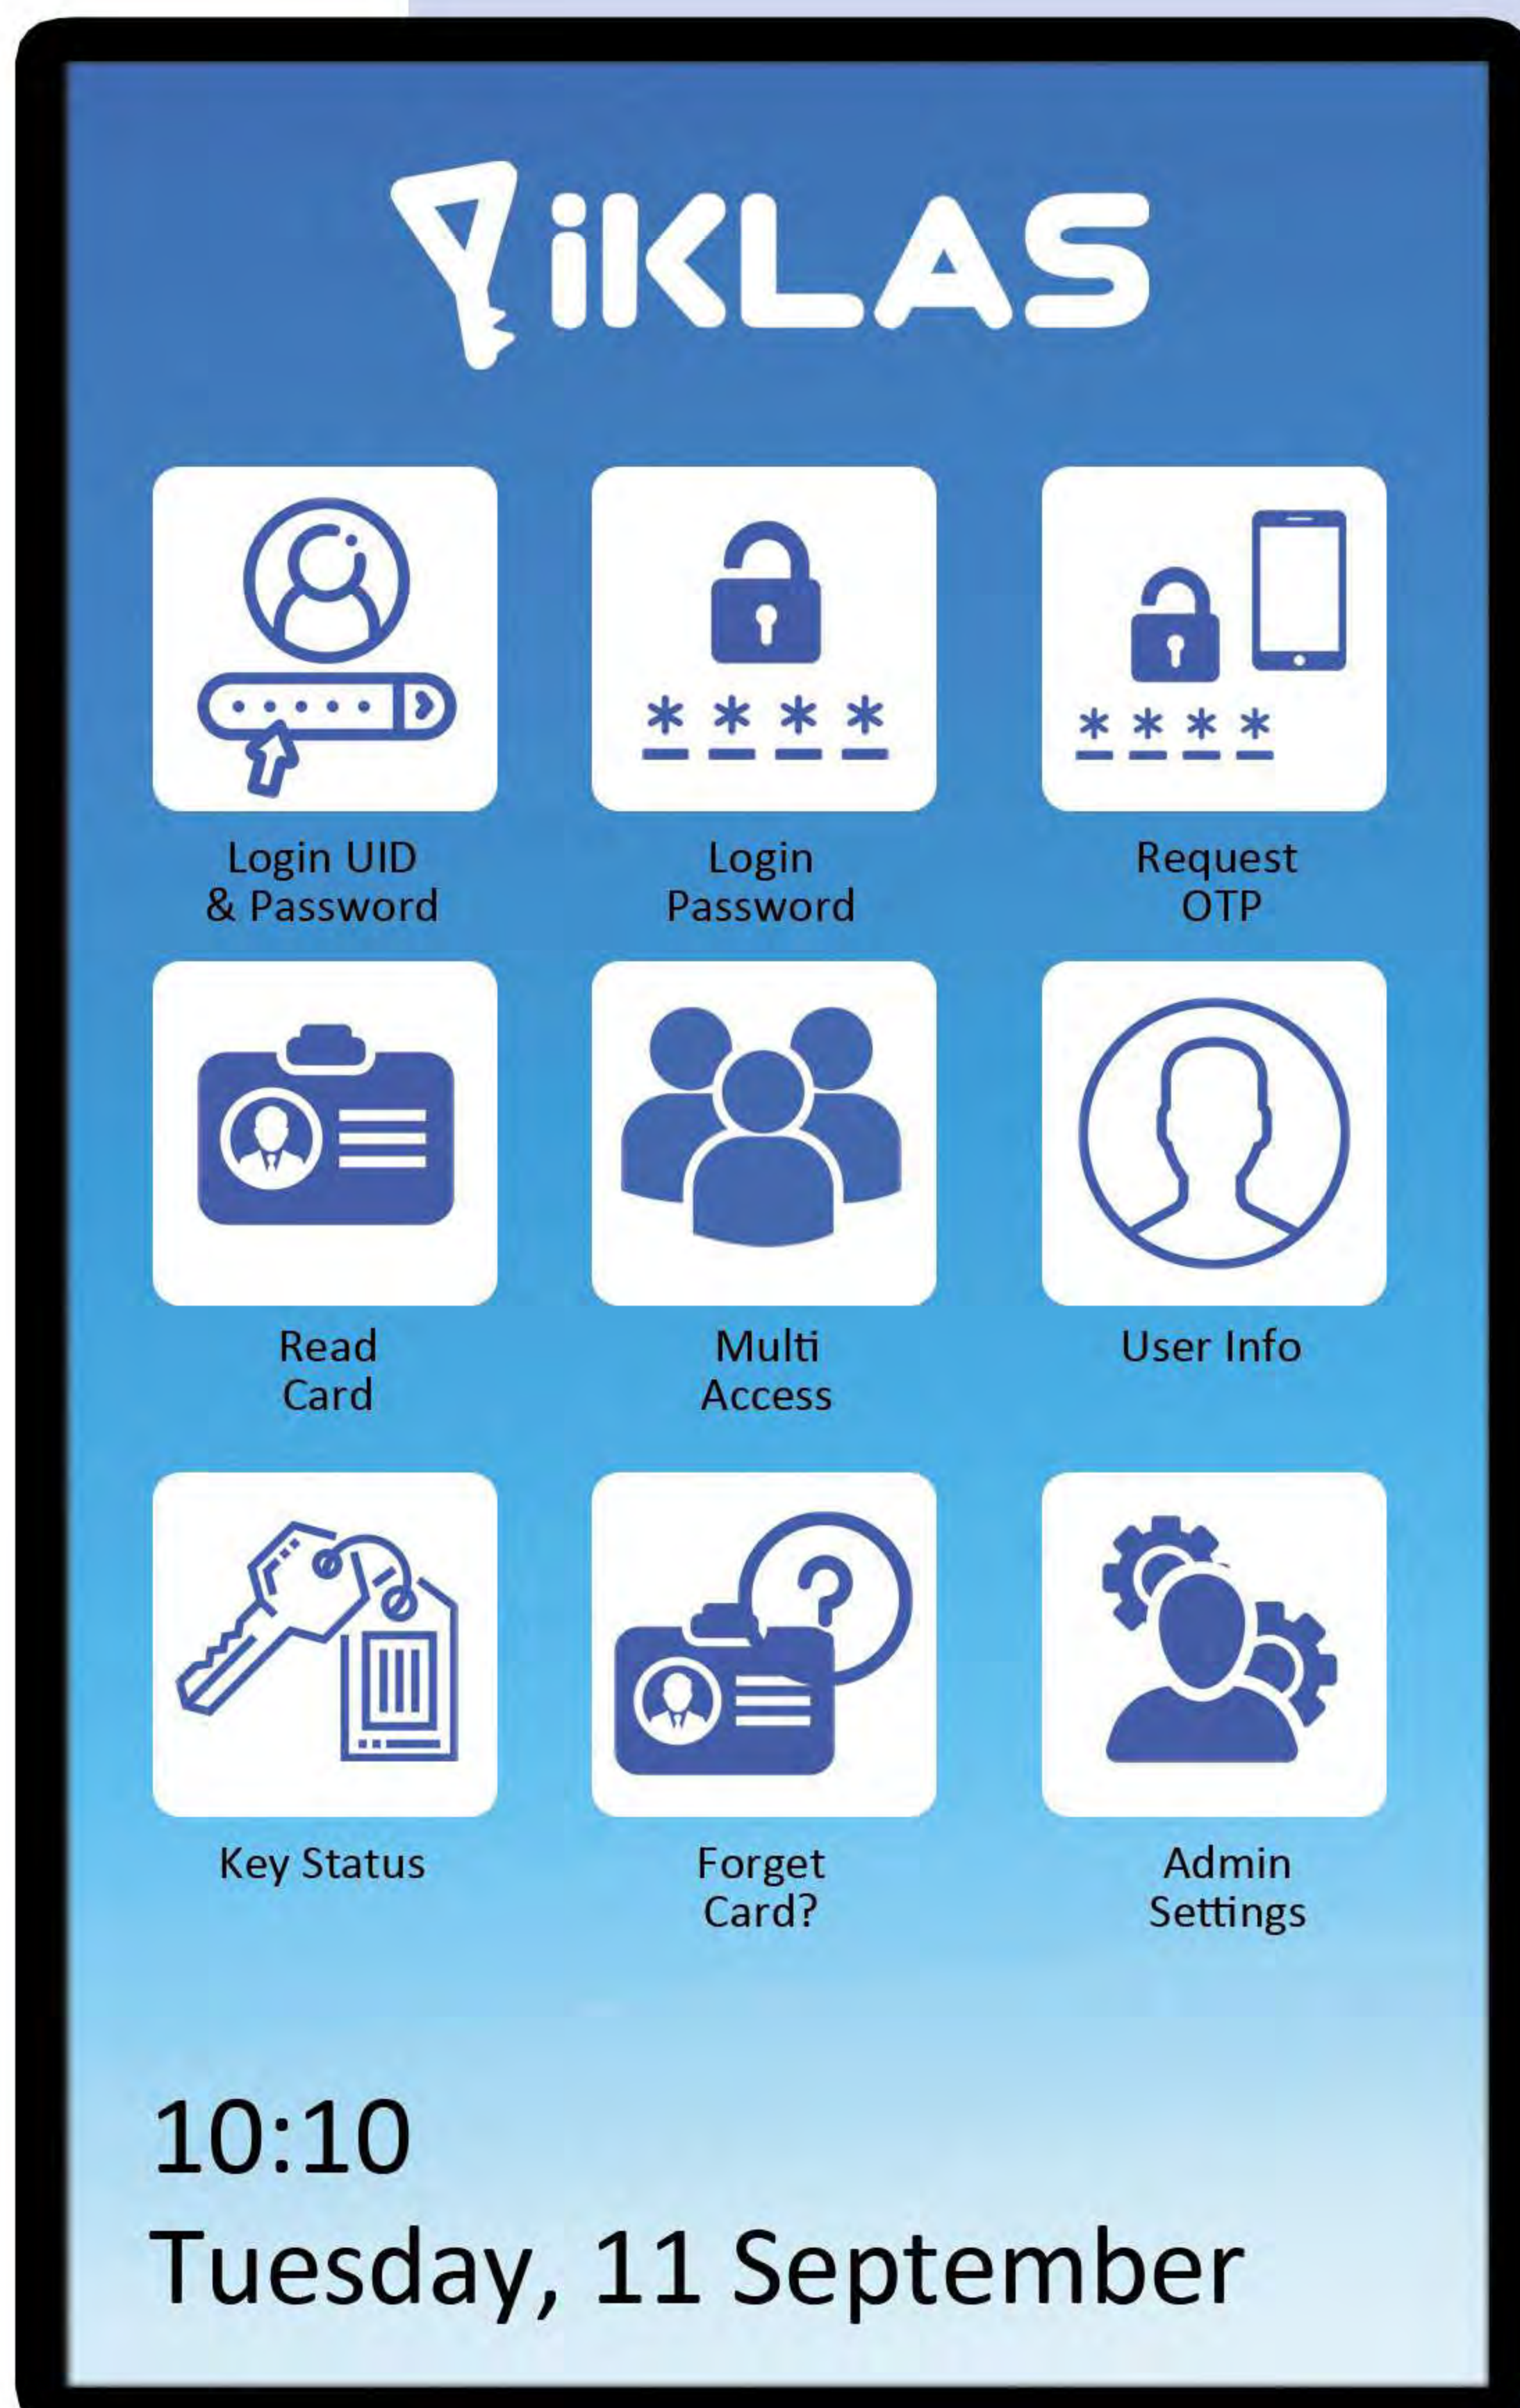

View and download transaction records directly on touchscreen via USB in CSV file format. USB port locked at all times, unless activated.

### Users forget to bring card causing additional work load for admin?

Fret not. iKLAS Touch allows administrator an option to allow user to login via password once per month (if enabled) if users forget to bring card.

### Various access modes for different users

Various access modes such as biometrics, access cards, alphanumeric user ID and alphanumeric passwords or dual authentication to allow combination of any of the above methods for greater security.

### One time password (OTP) for visitors

Visitors/contractors can request for access to keys. Upon request, the system will send an OTP to the administrator. The group members can then approve accordingly and send the OTP to the visitor/contractor.

### Perfect size for full experience

Users can enjoy uncompromised experience with our 7 inch LED touch screen.
