# BALLOT BAG RANGE

Custom Ballot Bag Solutions Also Available

The Ballot Box bags are designed specifically to meet government needs. This resulted in the production of a Ballot Bag range that is durable, easy to use and store. The addition of two Zip Trap Chambers allows the users to seal the bag using any narrow diameter seal selecting their preferred level of security. The types of compatible seals can vary from indicative to high security cable seals for use when the Ballot Bag is in transit. The Zip Trap Chambers protect the external lid and the internal ballot compartment.
