

# DH-MXVR1004-GFW

4 Channels H.265 Penta-brid 2 SD Mobile Video Recorder

- Support penta-brid(HDCVI/AHD/TVI/CVBS/IP) video input
- Support H.265/smart H.265 video compression
- Support 4 channels 1080P preview
- Support 2 SD card
- Support face detection
- Aviation connectors adopted
- Multiple monitoring: Web viewer, CMS(DSS) & DMSS

#### System Overview

DHI-MXVR1004 is the new generation of mobile video recorder, it uses H.265 technology and the advantages are lowering the transmission bandwidth and saing the storage. It can support 1080P high-definition real-time recording, real-time vehicle location tracking and monitoring and the face detection. All the information such as GPS and video can be uploaded via wireless network: 3G/4G/WIFI.

It has already passed EN50155/ISO16750 in order to meet the requirements of mobile use. This device can be used in kinds of solutions for different applications.

#### Functions

#### Anti-vibration

Using shock-absorbing material and structure, the new designed hard disk box can cope with varying degrees of vibration, keeping the system work normally all the time.

Wide range of power supply

As the voltage output of vehicle battery changes during driving, the wide range of power supply can protect the device.

#### 3G/4G/WIFI

Embedded with 3G/4G/WIFI module, the device can register into a public network to connect with VMS, and can send all the information(video/audio/alarm/gps) through wireless network.

#### GPS

Embedded GPS module can receive location information and upload to VMS. Even when the device is offline, it can upload the information after it's online again and the vehicle can be tracked on the electric map of VMS.

#### Multiple ports

With kinds of ports, like RS232, RS485, I/O, the video recorder can connect with various of accessories, such as card reader, fuel sensor, panic button and so on.system), so that the video, audio, alarm and location information can be uploaded to VMS.
