

The Touchstone Series is our entry level bamboo fly rod. But don't let that fool you. We don't sacrifice tradition and action in this series! In fact, we use the same tapers as our premium Rubicon rods, but finished out in an affordable way to introduce anglers to bamboo with a few less bells and whistles. Each rod is made to order over 30 or so hours, and is marked with a serial # denoting length, weight, maker and taper source.

#### Touchstone Series Standard Features:

- ❖ Taper of your choice
- ❖ One (1) tip – *extra tips available*
- ❖ Stainless ceramic stripper
- ❖ Customized cork handle
- ❖ Unique nickel silver Touchstone hardware & green & black silk wraps
- ❖ Aluminum carry tube with rod bag
