# MULTI V<sup>TM</sup> IV PRO

## About LG VRF Technology

Variable Refrigerant Flow is a technology introduced as a system to minimize efficiency losses and provide sustainable energy benefits. LG VRF systems are engineered to save on the cost of ducts, distribution fans, water pumps and water piping. VRF systems have a lower life cycle cost of any system on the market today.

## Why LG VRF?

The benefits are numerous; energy efficiency for owners, installation easiness for installers, diverse units that meet any designer's demands, and outstanding performance for users.

## Inverter Technology

With LG's latest inverter technology compressor, the LG Multi V IV PRO system matches variable load. This helps prevent constant cycling and results in tight temperature control, superior dehumidification, and optimized efficiency. Occupants are able to stay comfortable while reducing utility costs.

## Multi V IV PRO Technology

Multi V IV PRO is optimized for various building solutions such as office, hotel and educational facilities, and designed to provide all the standard benefits of the latest LG VRF system. A more localized cooling and heating performance and wide selection of line-up enables this product to respond to various projects that both owners and tenants can rely on.

## PRODUCT LINE-UP

The capacity range of total line-up is 8~60HP.

# EXCEPTIONAL EFFICIENCY

## LG's 4<sup>th</sup> Generation Inverter Compressor

Multi V IV PRO has high efficiency all inverter scroll compressor with frequency range 15Hz~150Hz.

- World Best Compressor Speed 150Hz**
  - Rapid response capability
  - Down to 15Hz : part load efficiency improvement
- Inverter Scroll Compressor**
  - Inverter SCROLL compressor of high efficiency
  - Suitable for more than 6HP
  - Low vibration / Low noise
- 6 By-pass Valve**
  - Compressor reliability is maximized with 6 By-pass Valve
  - Prevent compressor damage due to excessively compressed refrigerant more efficiently than 4 by-pass valve

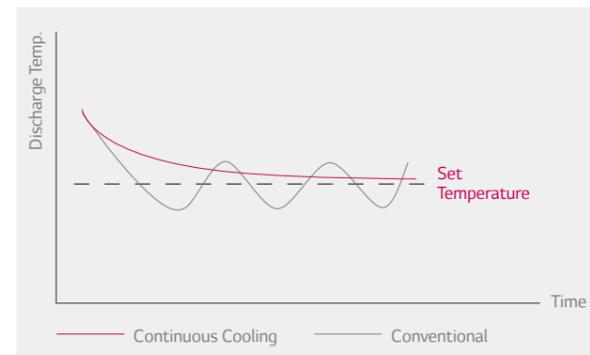

Operation range (Hz) graph showing Conventional (20-120 Hz) vs MULTI V PRO (15-150 Hz).

High-pressure gas and Low-pressure gas flow diagrams are also shown.

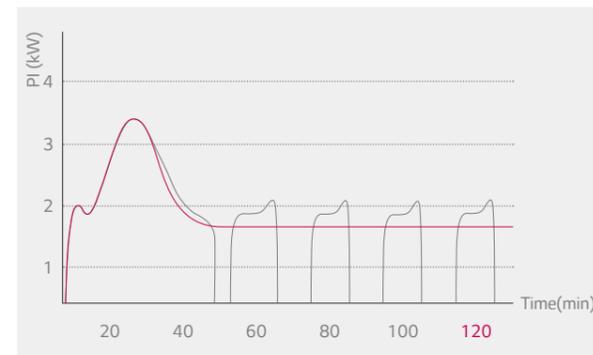

## Comfort Cooling

Without stopping, this function is able to maintain operation at mild cooling mode around the set temperature. You can experience more comfortable indoor environment while saving energy.

### Even Cooling Temperature

### Increased Thermo-on Time

Test Condition : Outdoor 35°C, Indoor 24°C / \* LG Internal Test result

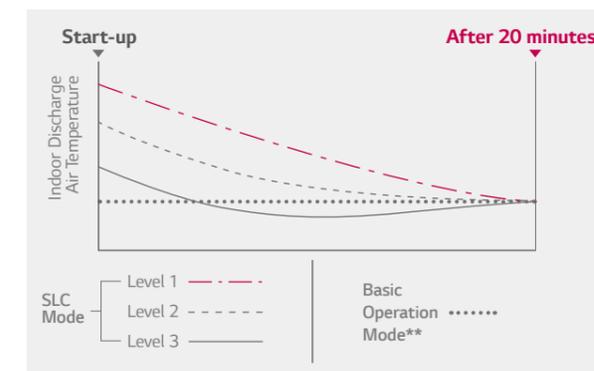

## Smart Load Control

To save energy, Multi V IV PRO changes indoor discharge air temperature continuously according to load.

### Start-up Operation

Operates for 20 minutes after Start-up. 3 levels of SLC operation can be set to save energy. (if not, can run in Basic Operation mode)

### Energy Saving Ratio\*

- By setting the SLC mode from Level 1 to Level 3, max. 20% of energy can be saved compared to Basic mode during Start-up operation.  
- After 20 minutes, during Auto-reactive Operation, SLC mode saves max. 32% Energy according to outdoor air temperature.

Mode	Operation	Start-up	Auto-reactive (by Outdoor Air Temp.)		
			22°C	30°C	35°C
SLC	Level 1	20%			
	Level 2	8%	32%	30%	0%
	Level 3	0%			
Basic		0%	0%	0%	0%

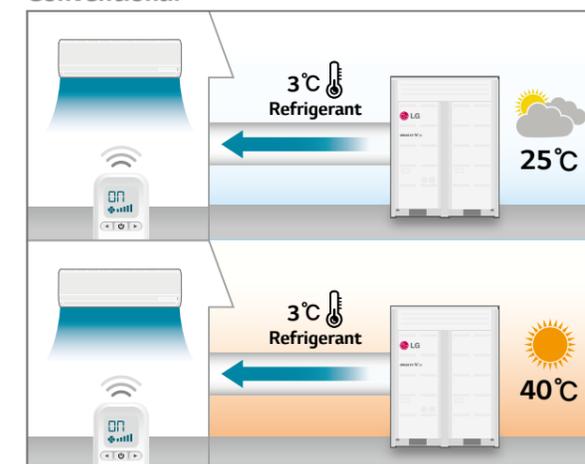

\*Energy Saving Ratio: Ratio of energy saved, compared to 100% power consumption for 30 minutes (LG internal test result)

\*\*Basic Operation : Indoor discharge air temperature is constant regardless of variable heat load, so operating efficiency is not relatively high

### Auto-reactive Operation

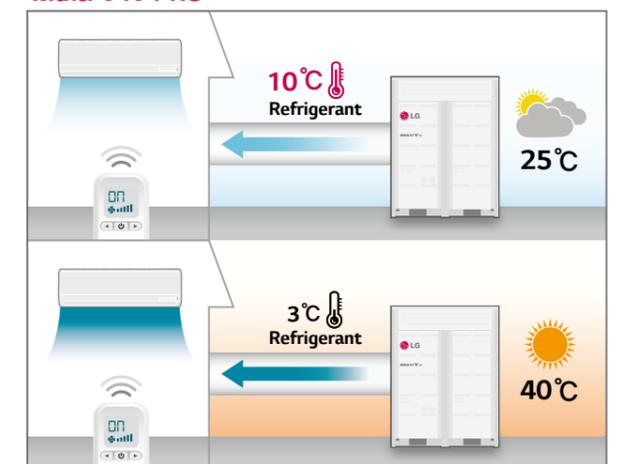

Automatically changes discharge air temperature according to the simultaneous loads. (OAT, IAT & Target temp.)

#### Conventional

- Variable : Indoor Air Temperature

#### Multi V IV PRO

- Variable : Indoor Air Temperature, Setting Temperature / Outdoor Air Temperature  
- Accurate operation control considering various circumstances.

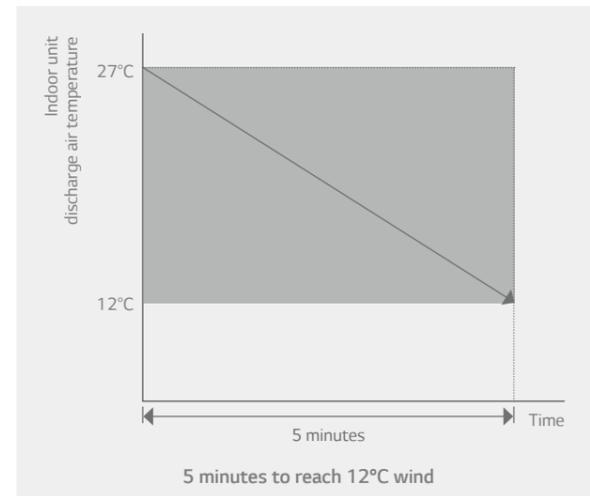

➔ Energy Saving 32%

# OUTSTANDING PERFORMANCE

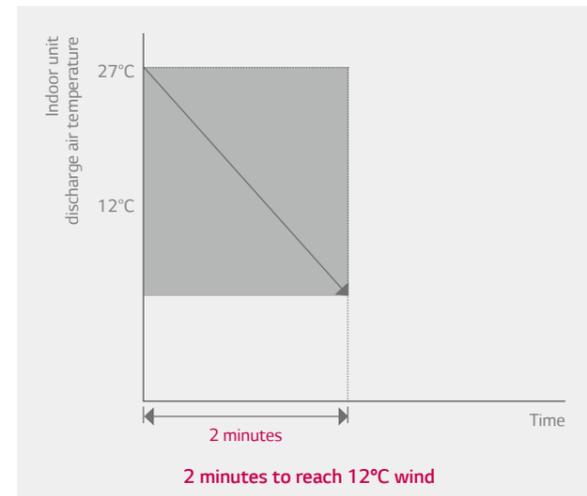

## Fast Cooling

Powerful cooling by all inverter scroll compressor and optimized cycle design.  
Cools indoor unit discharge air up to 60% faster.

### Conventional\*

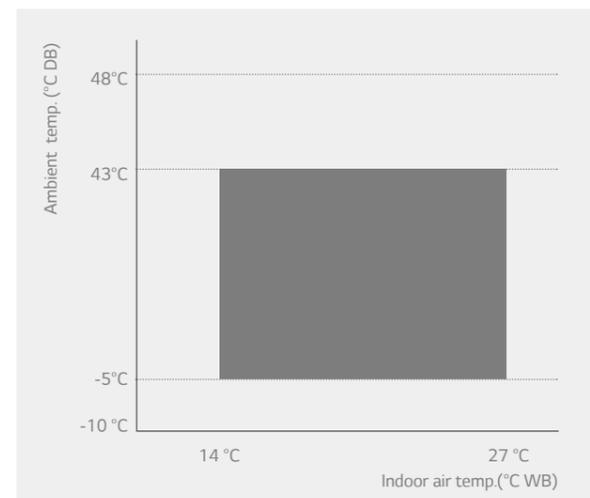

### Multi V IV PRO

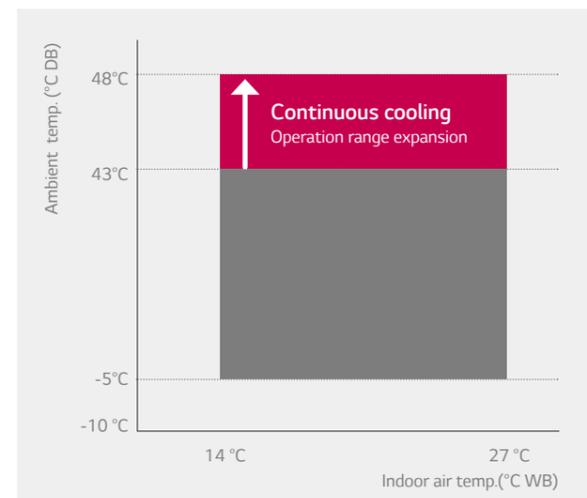

## Wide Operation Range

Multi V IV PRO has wide operation range with cooling, at outdoor temperature of 5°C ~ 48°C

### Conventional\*

### Multi V IV PRO

## Auto Dust Removal

Multi V IV PRO can remove dust(sand, leaves, and etc.) on heat exchanger of outdoor unit.  
This function is able to improve the heat exchange efficiency to maintain clean state on heat exchanger of ODU.

### Conventional\*

- Dust remains on heat exchanger of outdoor unit

\* Conventional : Multi V III

### Auto Dust Removal

- Dust is removed on heat exchanger of outdoor unit by reverse rotation of fan  
- With Dip switch setting, 5 min. operation in every 2 hours.

## ODU E.S.P.(External Static Pressure) Control

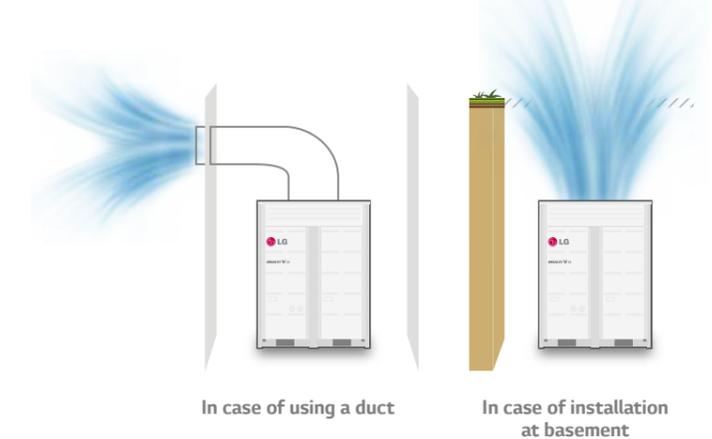

By E.S.P. Control, Multi V IV PRO secures the flow rate of ODU, enabling the duct as a discharge fan, or installing at a basement.

### Detail of E.S.P. Control

**High E.S.P. Mode**  
- 3 Steps control (ESP 20~40Pa / 40~60Pa / 60~80Pa)  
- Installation can be anywhere like a basement facility room

### Case of E.S.P. Control

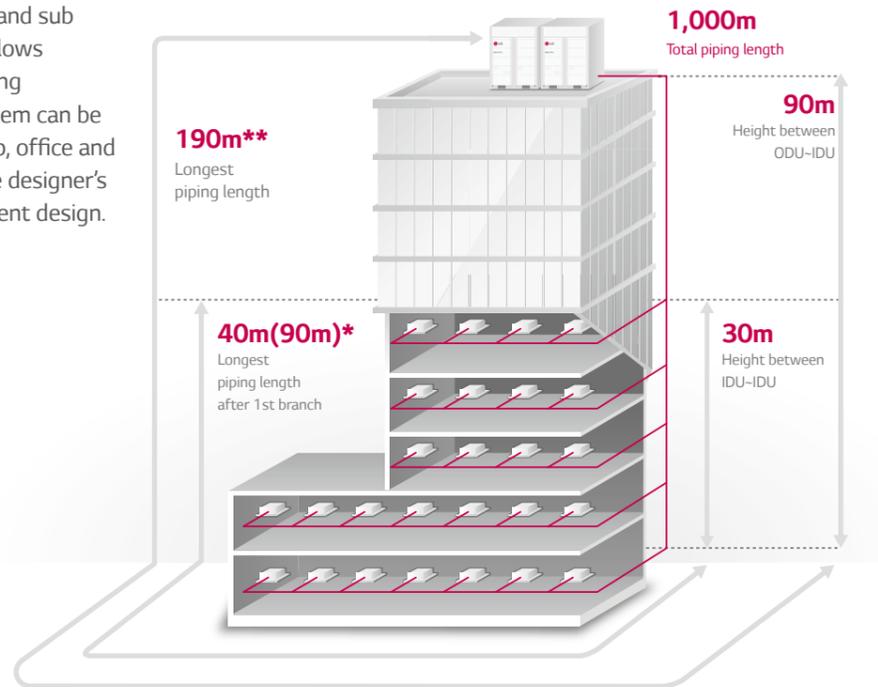

\* Installation condition - Equivalent Duct length : max. 40m (Duct Pressure loss : 1Pa/m)

# DESIGN WITHOUT LIMIT

## Expanded Piping Capabilities

Multi V IV PRO inverter technology and sub cooling control circuit technology allows greater piping length and outstanding elevation differences. A cooling system can be implemented more Flexibly in a shop, office and even high-rise building, reducing the designer's work time and providing more efficient design.

\*Liquid piping size up and dedicated setting on outdoor unit is required. \*\* Equivalent

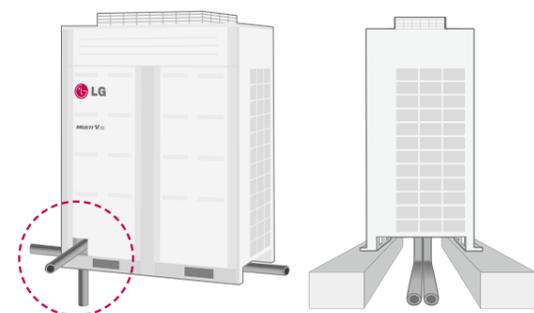

## Improved Installation

Elimination of common pipe between outdoor units reduces installation time, and application of 4-way piping improves flexibility of installation.

### Elimination of Common Pipe

### 4 Way Piping

Installation of bottom piping is available

## Compact Size & Light Weight

### Compact Footprint Area

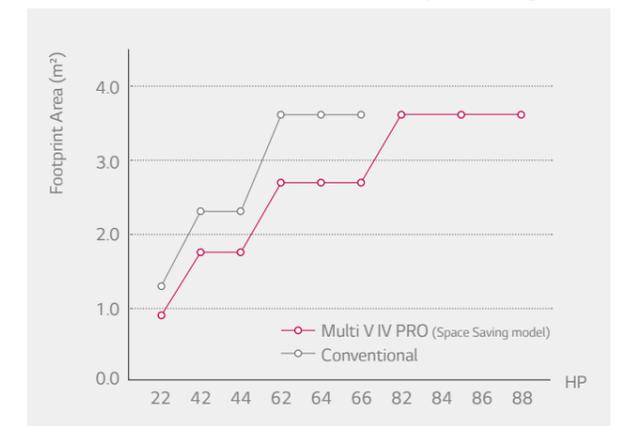

#### Conventional vs. Multi V IV PRO

26% smaller footprint area\*  
Saves installation space and eases transportation

\* Conventional : Multi V III 14HP

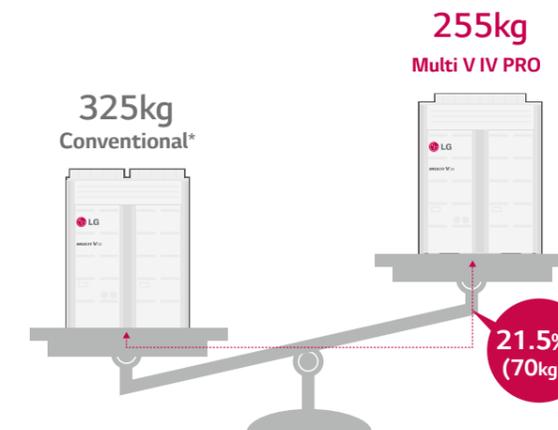

#### Conventional vs. Multi V IV PRO (Space Saving model)

Multi V IV PRO (Space Saving model) is maximum 32.9% smaller than Conventional model (22HP)

### Light Weight

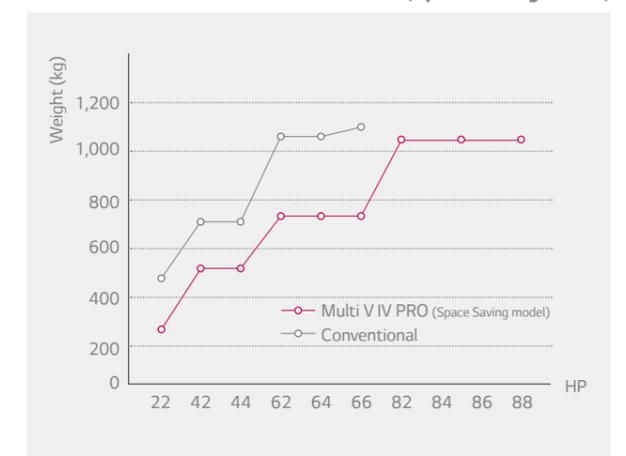

#### Conventional vs. Multi V IV PRO

21.5% lighter than Conventional model  
Easy transportation and installation available

\* Conventional : Multi V III 20HP

#### Conventional vs. Multi V IV PRO (Space Saving model)

Multi V IV PRO(Space Saving model) is maximum 46.9% lighter than Conventional model (22HP)
