LookCam Pro How to Guide

1. Firstly open up either the Play Store or App Store and Download the LookCam Pro App

LookCam on the App Store

 Now the app is installed we can go ahead and connect the camera to your device and then your network. If you have purchased a Micro SD card

install it now and connect the Micro USB to any 5V 2Amp USB charger. Now turn on the D.I.Y Camera by moving the black switch toward the Micro USB Socket on the camera. There should be a blue light turn on near the WiFi Antenna lead.

3. Open up your WiFi Settings on your Device on the back of the DIY camera is the camera's UID look for this UID in the WiFi list and connect to it.

< 5	Settings Wi-Fi

Camera	Add Camera	Playback					Ok	

5. You'll now be returned to the main app menu. From here touch the Gear icon to open the camera's settings page

6. From here you'll want to adjust the following three areas Alarm Config, SD Card Setting and WiFi Setting.

7. First up tap on Alarm Settings, from here you can turn the Motion ON(low, medium, high) the close option turns motion detection off. Alarm Schedule

allows you to set start and stop time for recordings to take place. Leaving Warning tone off and if you'd like to be notified of any movement turn Push Notifications On. Click OK at the bottom of the page when you are finished.

8. Next up is the SD Card Setting page, Turn on Alarm Record and Record Audio

9. The final step is the WiFi setting tab Choose your network from the list displayed (be sure to connect to a 2.4GHZ network only)

	RKM ROLLER Signal:35%	
	Telstra0BE6 Signal:29%	

10. Touch on your network and enter the password

11. Click OK when done and then let the device reconnect this process usually takes around 5mins, to check the device is up and running turn off your WIFI and go back into the app after 5mins you should be connected

using your phones 4G connection and the Camera will appear online on the main app page.

12. Lastly you will see a few icons at the bottom of the page these allow you to jump to any Photo or recorded video files and Playback.
