- 99,8% water and 0,2% chlorine dioxide (ClO₂).
- **Inactivates ALL bacteria, viruses and fungi.**
- 65-95% cheaper than bottled water.
- Minimal plastic waste.
- Does not contain chlorine or alcohol.
- Eliminates the biofilm in the tank.
- 5 times more efficient than chlorine/3 times more than alcohol.
- 1-K activated within minutes (compare to chlorine tablets: 30 mins waiting time).
- Cleans the water and tank at the same time.
- Non flammable – i.e. possible to transport by air.
- You drink no chemicals; only barely measurable amounts of salt.
- By Swedish Food Agency approved drinking water additive.
- Produced in Sweden by Swedish company, founded 1992.
- No aftertaste or smell.
- Safe & good for both people, animals & nature.
- More environmentally friendly than chlorine.
- Both customers, partners and lab-tests agree; XINIX products are superior to chlorine based products.
- Scientifically proven.
- Used today by leading companies, authorities and aid organizations worldwide.
- Easy to use (see other side).

We have products with the old logo and packaging; still many years left on the expire date.

Available at low whole sale price.

FACTS

Chlorine dioxide (ClO₂) is a GAS by nature – but Xinx has managed to stabilize and bind it into LIQUID FORM.

Chlorine dioxide is not a new disinfectant; it was discovered 1811 by Sir Humphry Davy. It is well-renowned as one of the worlds most efficient disinfectants. It has since then primarily been used for treatment of drinking water, but on a bigger scale only in industries. With Xinx FreeBact® now available in your pocket!

After treating your water with Xinx FreeBact®, the only residue is barely measurable amounts of salt, NaCl. You can't even taste it. Compare this to other water disinfectants, where you actually might drink chlorine. With Xinx FreeBact® all the good minerals will also remain in the water.

FreeBact® SURFACE On The Go

Perfect 50 ml spray to keep in your bag or jacket. Effective & easy-to-use disinfection for all types of surfaces. Spray your hands, handles, tables, fruit - and rest assured that you are not bringing unwanted bacteria or viruses with you.

FreeBact® WATER Drink 50 Liters

With this little bottle (50 ml) in the bag you get safe water. To be dropped into your glass or mug. Drink after 1-2 min.

1-K TAP WATER / clear water

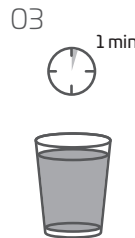

Ready to be used

Add 100 ml of water

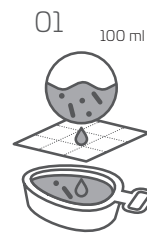

1 drop into a drinking glass

Wait 1 minute before drinking

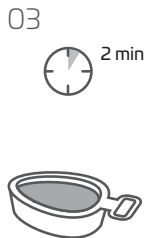

OTHER WATER / with visible particles

Add 100 ml of water, pour through a coffee filter, a tissue or similar

5 drops into vessel

Wait 2 minutes before drinking

FreeBact® WATER Tank 50 - 10.000 Liters

Clean up the tank and get rid of unwanted biofilm – at the same time as you disinfect the drinking water. No need to refill with new water. Drink after 40 min.

2-K INSTRUCTIONS

Activate before using

Work in an open space or ventilated area.

01 Unscrew the two childproof caps on the bottles.

02 Add all of solution B (small neck) to solution A (large neck).

Warning: A strong odor will occur. Never inhale the gas before or after mixing.

03 Put back the cap on the A-bottle and shake it gently. DO NOT turn it upside down.

04 Open the cap half a turn. Wait 10 minutes before using the mixed solution.

05 Pour the solution into the tank. Wait 30 min before use.
