UN - No. 0312**

**ADR
CLASS 1
ITEM: 43**

Nature of Hazard: Fireworks can catch fire by influence of fire or heat and/or can explode. No mass explosion. Danger of being hurt by objects flying about.

Protective devices: 2 fire extinguishers (contents 6 kg each)

EMERGENCY ACTION

Notify police and fire department immediately

- If possible move vehicle to open ground and stop the engine.
- No naked lights. No smoking.
- Mark roads and warn other road users.
- Keep public away from danger area.
- Avoid making sparks. Use non-sparking handtools to avoid direct metal to metal contact.

SPILLAGE

- Do not expose to electric current or heat.
- Warn everybody. Explosion hazard.

FIRE

water, dry

- For small fire on cab, tires or engine which can be extinguished quickly before it reaches the cargo use vehicle extinguisher, powder, earth or sand.
- In case of extensive fire which is spreading to the cargo, do not attempt to extinguish.
- Evacuate the area within radius of 100 metres.
- Take cover.

FIRST AID

- Seek immediate medical help.
