DEXGREEN

Dexgreen Openreach App – Changelog (09/11/2020)

4.10(iOS), 4.5.0.3 (Android) App Update Notes: (as of 09/11/2020)

- Added iOS 14 Support.
- Added new content to training courses
- Added new modules to training courses – Proof of Competency (have your practical work verified) and Upload Live Jobs (Get feedback on your work via Peer-reviewed network of managers/trainers)
- Added optimisations to screen load times to pull URLs and images faster.

4.9.2 App Update Notes: (as of 18/08/2020)

Added new features to DexAR:

- Added a spirit level, use your phone to check if surfaces are level.
- Cable length is now displayed on the cable. Simpler to check the distance of cable sections.
- Imitation cable now shows you the path of a cable section before it is added.
- New animations.
- Bug fixes

4.8.4 App Update Notes: (as of 04/08/2020)

- Added course feedback form to training courses
- Fixed issue in the search bar when no results would appear

4.7.0 App Update Notes: (as of 24/07/2020)

- Added Augmented Reality Functionality through "DexAR" module. Access this from the side menu.
- Place products on walls, interact and view more information about these products.
- Measure distances of cable and plan virtual scenes.

4.6.0 App Update Notes: (as of 16/07/2020)

- Simplified Sign In: Sign in faster, stay logged in longer and reset your password much more quickly.
- Faster Load Times: Up to 3x faster than initial app launch and app performance gains throughout.
- More training content.
- Revamped Updates.
- Bug Fixes and Visual Glitches removed.

4.4.0 App Update Notes: (as of 18/05/2020)

- Fixed crashes in the app due to an error in the API requests.
- App Optimisations
- Fixed glitches in the sign in process where an error would sometimes appear that the password is wrong.

4.3.0 App Update Notes: (as of 29/04/2020)

- Fixed bug where the app was crashing due to camera permission.
- Fixed crash on iPhone 5S/ SE devices where the app crashed when leaving the app idle.
- Fixed Crash in Quiz where starting for the first time.
- Improved UI issues on iPhone X and iPhone 5S/ SE devices.

DEXGREEN

2.0.1 App Update Notes: (as of 15/07/2019)

- **Sharing:** You can create links to various parts of the app (products/ resources/ news) that you can share. When someone opens this link, it will prompt them to install the app if it's not installed or it will open the shared item directly in their app. You can also copy the product name and code to paste into your application of choice.
- **Better Searching:** Locally known names for products have been added. This means that you can find products in the app by their slang names.
- **Improved My List:** Rename/ Delete lists, More export options and better interface.
- **Improved Resources:** Now you can see a thumbnail preview of the resource you want to view.
- **Relocated Scanner for QR codes** to the navigation bar for faster retrieval of info from all screens
- **Better Offline Functionality:** There will be an initial loading screen when first opening the app, this gives you more freedom to use the app offline. PDFs are excluded from this initial download, but they can be downloaded separately.

1.2.0 App Update Notes: (as of 29/03/2019)

- **Improved the log in process:** Added automatic email verification. Just click on the link sent to your account to validate the account.
- **Fixed crashes** when taking photos for feedback.
- **Fixed issue** where catalogue wouldn't open

1.1.0 App Update Notes: (as of 02/03/2019)

- **Updated app** with interactive MJC section with Installation Videos
- **Bug fixes** to the search bar.
- **Fixed crash** when navigating the menus

1.0.0 App Update Notes: (as of 28/02/2019)

- **Initial app release.**
