

Ring Size Guide

Print out this ring sizer below- make sure your printer is at 100% or it will not be an accurate measurement.

Cut out the ring sizer around the edges and then cut along the slit line line. Slide the clipped end through the cut slit and place it on the finger you would like to size. Gently pull the paper snug to your finger, but making sure you still can slide off the ring easily enough over your knuckle. The number that lands closest to the slit is your size.

Already have a ring - Place it on the circles to find the right size!

If this ruler does not line up with a real ruler- Your printer is not at 100%
