**WHAT'S IN THE BOX**

- PLEASE CONSULT THIS CHECKLIST FOR ALL PARTS.

**OTHERS**

- WHAT CAN I DO IF THE IMAGE IS NOT CLEAR?**
  - The camera is equipped with Ultra HD Lens and sensor to produce superior image, however the image quality may be affected by the lighting condition
  - Ensure the camera is NOT facing to environment with poor lighting condition or with extreme high contrast. Ensure it is NOT facing directly to bright lighting sources such as sun light.
  - Ensure your phone and your router has enough bandwidth to stream HD video. A minimum of 2Mbps is required to stream each camera. If the network does not meet this requirement, the live view stream will be downgraded to SD automatically
- NIGHT VISION**
  - The camera is equipped with infrared LED technology to capture black and white night vision image in detail at night. However, the night vision image quality may be affected by the following factor.
  - There are high contrast light sources such as car headlight pointing to the camera

hugolog

**APP SET UP**

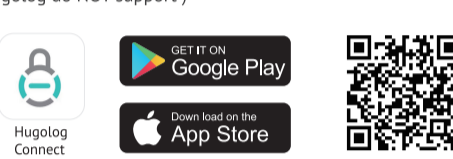

- Connect the camera to power via included USB Charger (If you are not setting up the camera for the very first time, press and hold the "Reset" for 5 seconds until you hear a beep.

Speaker

Power

Reset

- Please download the Hugolog Connect App from the App Store or Scan the QR Code below. Hugolog Connect App is available for both iOS and Android OS. Search the name 'Hugolog Connect' in App Store or Google Play (The other Hugolog apps, such as Hugolog do NOT support)

**HOW TO TURN ON AND OFF MOTION DETECTION?**

- To turn on or off motion detection setting, go to the camera menu and click on Detection Alarm Settings

**WHAT CAN I DO IF I CANNOT RECEIVE NOTIFICATIONS?**

- Ensure your phone notification setting is enabled for Hugolog Connect APP
- Ensure the phone has decent network bandwidth
- Ensure the camera is online

**WHAT CAN I DO IF I RECEIVE TOO MANY NOTIFICATIONS?**

- If the camera is placed at location with heavy traffic, we recommend to relocate it to a place with less traffic to receive less alerts.

hugolog

**WHAT CAN I DO IF THE CAMERA IS OFFLINE?**

- Make sure your phone is working. Check other devices connected to the same Wi-Fi and see if they can use the Internet.
- Check if your Wi-Fi name or password has been changed by your family and you do not know. If yes, please reset the camera and set it up all over again.
- If the Internet works well and the camera still shows offline, please restart your router, wait for 2-3 mins and see if the camera will be online automatically. Sometimes when the router is overloaded, the camera will be offline.
- Check the indicator of the camera. If the camera shows solid blue when it is online, now there is no light, maybe the power cable is defective. You could change the cable, restart the camera, and check.

Check if WIFI password or router is changed. If so please reset the camera

- Ensure router is powered on and online
- Ensure camera has power
- Ensure the phone has decent network bandwidth
- Check the app is on latest version

**TROUBLESHOOTING**

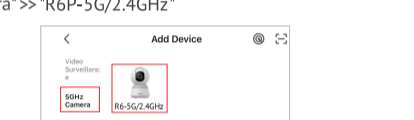

**IF YOU CANNOT CONNECT THE CAMERA TO THE INTERNET, CHECK THE FOLLOWING STEPS**

- Ensure you are connecting to Wi-Fi network (Both 2.4GHz and 5GHz networks can be supported)
- Ensure WiFi password or SSID is correct
- Ensure the camera is placed as close to the router as possible
- Ensure camera is powered on and the indicator is blinking rapidly before scanning the QR code
- Ensure you are using the correct APP (Hugolog Connect)
- Ensure the camera is scanning the QR code on the phone in the correct way
- If the above doesn't help, reset the camera and start pairing again or you can find us at: [support@hugolog.com](mailto:support@hugolog.com)

**WHAT CAN I DO IF THE CAMERA STOPPED WORKING?**

- Close the APP and Restart the APP again

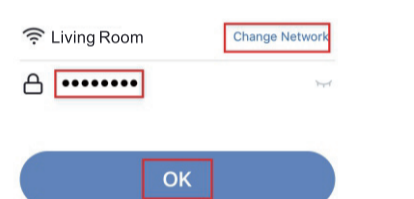

- Click on the "+" sign to add the camera. Continue to click "5GHz Camera" >> "R6P-5G/2.4GHz"

- Wait until the LED indicator is flashing slowly, which means the camera is ready for pairing

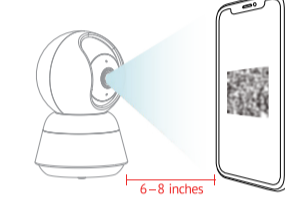

Status light

- Enter the WiFi Password to generate a QR code that carries your WiFi information

hugolog

- Use the camera to scan the QR code on the phone (keep the camera 6-8 inches away from the phone)

**Tips:**

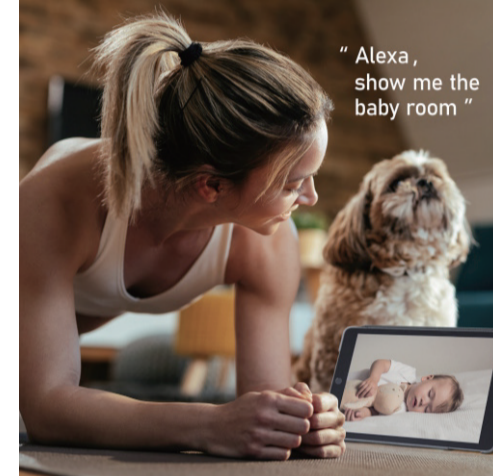

- This camera can support both 2.4GHz and 5GHz network.
- Please put the camera near to the router during setting up the camera, after connection succeed, you can place the camera in another place.

Note: Put the camera close to the router (3 feet) during setting up the camera.

If the pairing is not successful, press the Reset button for 5 seconds until you hear a prompt and start again. Or check the FAQ section for more troubleshooting steps

If you encounter any issues during use, please feel free to contact us: [support@hugolog.com](mailto:support@hugolog.com)

You can now tell your Echo device to show the camera feed by calling Alexa, Show Baby Room. You can change and update the camera name in the Hugolog Connect APP camera menu. (Refer to Step 3)

**FCC COMPLIANCE**

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

The manufacturer is not responsible for any radio or tv interference caused by unauthorized modifications or change to this equipment. Such modifications or change could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

RF warning statement:  
To maintain compliance with FCC's RF exposure guidelines, this equipment should be installed and operated with a minimum distance of 20 cm between the radiator and your body.
