

Cut out and keep one near your machine. Give the other 3 copies to sewing friends!

Emergency Protocol for Thread Nests:

1. Take a break- recover your sense of humor :)
2. Completely rethread machine
3. Change needle if damaged
4. Change thread if it's brittle or bobbin is rough
5. Set the top thread tension back to factory settings (usually there will be a mark)
6. Find out if your fabric requires a different needle type or stitch pattern ie: stretch fabric
7. Thoroughly dust thread path, discs, and bobbin area
