

Quick Installation Guide

support@brostrend.com

Wireless Dual Band USB Adapter
Model No.: AC1/AC1L
Version No.: V1

For MAC OS X

Step 1: Connect to your MAC

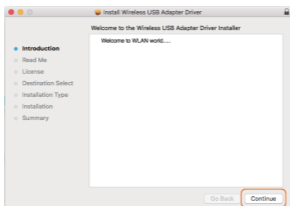

Step 2: Install Driver

2.1 Get the Latest Driver

The CD is of small size, in case your MAC cannot run CD of this size, please DO NOT run this CD on your MAC. Instead, please download latest driver from our website <https://brostrend.me/driver> or send us email at support@brostrend.com to get it.

2.2 Please unzip the driver, find the corresponding version of driver for your MAC OS X, and then click  to start the installation.

2.3 Please kindly follow the on-screen instruction as below to finish the installation:

Step 3: Join a Wireless Network

3.1 Click the below to Turn Off the Wi-Fi adapter integrated in your MAC.

3.2 On desktop please click the below icon to scan your Wi-Fi network, input the correct Wi-Fi key and you will be able to connect to your wireless network.
