

ATLAS MACK

CONFIRM PRINTED PAPER SIZE

PLEASE READ CAREFULLY

To print this guide to scale, be sure this guide is printed in US Letter size and **scaled to 100%**. You can check the accuracy of your print by using a ruler on the measurements above.

- ♦ The ring should fit over your finger comfortably, snug enough so that it will not fall off, but loose enough to slide over the knuckle.
- ♦ The interior of a Luxe Fit ring puts more metal in contact with the finger so they tend to fit a little tighter. If you are in between sizes, round up for this style ring; however, if you have large knuckles, you may need to go up half a size.
- ♦ Many people find that the variance of a half size or less will still fit comfortably most of the time.
- ♦ Avoid measuring your fingers when they are cold and damp, that is when they are at their smallest. The best time of day to measure your finger is at the end of the day.
- ♦ Keep in mind that finger size fluctuates slightly based on temperature, diet, and activity. The way your ring may fit will vary over the course of a day.

MEASURE WITH EXISTING RING

To find your ring size, use an existing ring that fits you well on the finger you would wear your Atlas Mack ring. Match the inside of your ring with the circles below. Once your ring has been placed on the correct size, you should see only the white circle below it, there should be no black showing through.

Note: If your ring falls between two sizes, we recommend sizing up.

Carefully cut out the ring size ruler below, then cut the line to create a slit. Wrap the ruler around your finger at the base, and pull the tapered end through. We also recommend measuring your knuckle to ensure that your ring will fit comfortably. Select a size that goes on and off your finger easily.
