

## H series petrol engine Brushcutters

### Multifunction

As the name suggests, “H” series multifunction brushcutters have multiple uses. Designed to meet the needs of those who occasionally need extra equipment, it combines several high-performance tools in a single machine. As well as pruning bushes, it is very useful for cutting the lawn and trimming hedges. Thanks to the separately purchasable applications and the no-tools quick coupling system, changing activities in the same work session can be done simply and rapidly.

Piston with 2 elastic rings, forged and machined steel crankshaft and connecting rod, needle roller bearings, nickel plated cylinder: constant high efficiency guaranteed over time, even when undertaking heavy work schedules.

Exceptional reliability thanks to the Ø 8mm rigid drive shaft running on 6 self-lubricating plain bearings.

AlwaysOn switch: rapid engine stopping, and thanks to the autoreset function, always ready to restart.
