AIR PRESSURE PUMP 20V - POWDP7020

This cordless POWDP7020 air pressure pump of Powerplus will save you a lot of time and trouble, because you don't need to use a large compressor or extension cables. It inflates sport balls, air mattresses, but also car and bike tyres. The pump is supplied with 3 adaptors to adjust your tool to the activity. They can be nicely stored away in the built-in storage on the machine.

The air debit of no less than 30l/min and the powerful 20V battery help you realise all these tasks on site too. The clear digital pressure gauge with presettings and autostop (after 8 minutes) shows you the right pressure (max. 8 bar). The flexible hose and LED worklight enable you working exactly on the spot you wish.

You can slide the 20V as well as the 40V battery on the air pressure pump. The Dual Power charger and battery are sold separately. So you don't have to buy a new battery for every Dual Power device. You combine them to your heart's content with a whole range of power and gardening tools.
