POWE30015

JIGSAW 710W

The jigsaw POWE30015 with 4 pendulum positions guarantees an accurate sawing performance. The pendulum action lets you saw faster and in harder materials. The adjustable base allows the blade to tilt up to 45°, so you can also make precise angled cuts.

The maximum cutting depth of this 710W jigsaw is 8mm in steel and 65mm in wood, with a rotation speed of 0-2800min⁻¹. You control the speed needed for the task with the variable speed dial.

The dust extraction adaptor permits a connection to a vacuum cleaner for a clear view of the cutting line and a clean, dust free working environment. The blades can be inverted easily thanks to the quick blade change system. One blade for wood is included.
