Spool  
Incl.

1. On/Off Switch
2. Cable Relief
3. Safety Guard
4. Rotating Wheel
5. Soft Grip

**POWEG6020**

This Powerplus electric grass trimmer is easy to operate and ideal for finishing the grass edges of your lawn.

The grass trimmer has a cutting width of 30 cm. This makes it also suitable for maintaining smaller lawns in urban gardens. The head of the grass trimmer can be rotated 90 degrees. As a result, it can also trim vertically, for example to trim the edge around a hedge. The support wheel on the trimmer head provides the necessary ease of use.

Both the angle of the trimmer head and the position of the additional handle are adjustable. In addition, the shaft can be extended telescopically, so that the grass trimmer can be perfectly adapted to each user. The automatic line extension system extends the trimmer line each time the tool is turned on. As a result, the trimmer always delivers a good result.

The old trimmer line is automatically cut off by a cutting blade in the protective cap. The range of the grass trimmer is determined by the length of the extension cord, as the trimmer has a short power cord for safety reasons. The cable strain relief ensures that the extension cord is not pulled out accidentally during trimming.

**TECHNICAL SPECIFICATIONS**

- Rated Voltage AC max: 240 V
- Rated frequency (fn) max: 50 Hz
- Rated power (Pn): 550 W
- Spool thread diameter: 1.6mm
- Spool thread length: 6m
- Cutting Width: 300mm
- Rotation speed grass trimmer: 10000 min-1
- Number of Spools included: 1

**Features**

- Edge roller
- Adjustable trimming angle
- Side edge cutter
- Safety guard
- Rotating wheel
- Soft grip
