POWDPG80460 PRESSURE SPRAYER BACKPACK 16L 20V

With this Dual Power backpack pressure sprayer, spraying or disinfecting large surfaces is a piece of cake. The 20V device has a maximum flow rate of 1.5 litres per minute and a steady pressure of 6 bar. Its large 16 litre tank can be simply worn as a backpack. The soft shoulder straps provide the necessary comfort. Additionally, no annoying extension cords are needed, offering full freedom of movement.

The cordless tool comes with four different spraying nozzles with different spraying patterns. Its robust Tecnoflon sealings are acid-resistant. Therefore, the POWDPG80460 can be used to water and fertilise plants in the garden or greenhouse, as well as disinfect a large number of surfaces. It is also suited for herbicide and green algae detergents.

Separate battery and charger

The battery and charger are not included. They are sold separately and are compatible with the whole Dual Power range.

Which Dual Power batter is compatible?

This 20V weed sweeper is compatible with both the 20V and 40V Dual Power batteries. The use of a 40V battery ensures an even longer battery run time, compared to the use of a 20V version.
