

HISTORY

CH468 was designed by Hans J. Wegner in 1960, but was never put in production.

Carl Hansen & Son launched the chair in 2010 based on Hans J. Wegner's original 1:1 drawings and a scale model.

DESCRIPTION

The CH468, also known as "the Oculus Chair" is a fully upholstered easy chair on stainless steel legs.

The design of the backrest and seat enables a variety of positions always providing excellent support for the back, shoulders, neck and head.

The stainless steel legs give the chair an ideal pitch as the front legs are slightly higher than the rear legs.

It is best placed where its elegant lines can be viewed from all sides and works equally well in groups and on its own.

It is built upon a solid beech frame, with hand-finished stainless steel legs that are virtually maintenance free.

Made from beech, stainless steel and cold foam.

Upholstered in the customer's choice of fabric or leather

The footrest, CH446, fits perfectly with the Oculus Chair.

ENVIRONMENTAL INFORMATION

Carl Hansen & Søn and sustainability

People's fascination of the combination of good design and wood, as well as other natural materials, is something that transcends time and fashion. At Carl Hansen & Søn, we believe that this fascination helps to explain the great interest in our furniture, and we take very seriously concerns about the sustainability of the natural resources upon which we depend for our products. That is why we strive every day to improve our production methods, logistics and sales efforts in respect of scarce natural resources.

We buy wood only from sustainably managed forests. All sourced wood meets EUTR 2013 regulations, Danish Forest Legislation and current international certifications. Oak, beech and ash come primarily from Danish forests which are managed according to the principles described in Denmark's National Forest Programme; some of these wood types are also sourced from other similarly managed European forests, or, in the case of walnut and cherry, North American forests.

We use every possible bit of these fine hardwoods in our furniture production. Inevitably, however, there are some scraps, which are then used to produce other products or recycled in district heating plants.

THE DESIGNER

Hans J. Wegner was born in 1914 in Tønder, the son of a shoemaker. At the age of 17 he was apprenticed to a carpenter (H. F. Stahlberg) and it was at this time that he developed his first design. At the age of 20 he moved to Copenhagen to study at the institution now known as The Royal Danish Academy of Fine Arts, School of Design but which back then went under the more modest title of "The Artisan College."

He studied there from 1936-1938, before taking further studies as an architect. In 1940 Wegner initiated a joint project with Arne Jacobsen and Erik Møller in Aarhus, which involved fitting out Aarhus' town hall. It was also in

1940 that Wegner began to work with Master Carpenter Johannes Hansen, a man who played a significant role in bringing modern design to the Danish public. The then Copenhagen Industrial Art Museum (now Design Museum Denmark) purchased their first Wegner chair in 1942. **Hans J. Wegner** opened his own design studio in 1943, and in 1944 he designed his first "China Chair" in a series inspired by the Chinese Emperor's thrones.

One of the chairs in this series is what is probably Wegner's most famous work "The Wishbone Chair," which he designed in 1949, and which Carl Hansen & Søn have manufactured since 1950. **Hans J. Wegner** is regarded as one of the world's outstanding furniture designers. He was one of the motive forces behind the Danish Modern movement which did much to change people's view of furniture in the 1950s and 60s. His design retain relevance for us today and his sense for details is a source of constant wonder.

Wegner has received a number of prizes and recognitions. Amongst other things, he is an honorary member of The Royal Danish Academy of Fine Arts and has received an honorary doctorate from the Royal College of Art in London. He was also the first ever recipient of the Lunning Prize and received the 8th International Design Award in Osaka, Japan. His works are exhibited at major international museums including The Museum of Modern Art (MoMA) in New York and Die Neue Sammlung in Munich.

Hans J. Wegner died in Denmark in January 2007

Hans J. Wegner's contributions to Danish design:

- A master carpenter first and a designer second: Perfectly finished joints and exquisite forms.
- A deep respect for the wood and its character and an everlasting curiosity about good materials.
- He gave minimalism an organic and natural softness.
- He is considered as "the master chair-maker" and designed more than 500 chairs during the course of his life.
