Junior BLVD

At Flying Solo's NYFW show series this past September 10th, Junior Blvd - a childrens' clothing brand - debuted its SS23 collection. On the innovative side of childrenswear, the line featured some military-inspired cuts and colors. This included a few aviator-style looks in olive green, royal purple, and navy. To keep the collection light and fun, a few pops of pastels were also presented within the same looks. Also present were metallic magenta shorts, stripes, some understated black pieces, and unique usage of zippers on the diagonal.

The brand truly caters to the taste of today's children (and parents), by modernizing the selection & veering away from the typical cartoon/graphic style of clothing previously offered to this market in the 00's and 10's.

Founded by artist Louise Sykes, Junior Blvd has earned numerous accolades while aiming to serve a generally overlooked demographic.

Be sure to keep an eye out for future projects by this Australian brand.

EIGHT SKINCARE ROUTINE CHANGES FOR FALL

By Anna Miller

Now that the summer is in its last phase and we are saying goodbye to a lot of sun, relaxed pool days and beach outings, it's time to welcome fall. It is a cozy season with rainy days indoors, spice lattes and Halloween (oh, yes!) but also the weather change may be challenging for your skin. So it's important to change your skincare routine just as you change your wardrobe.

In summer the main problems are exposure to the sun, which leads to excessive pigmentation and signs of aging, as well as the exposure to chlorine or salt which can cause drying and temporary irritation. Fall comes with temperature changes, winds, humid days and drier nights.

HERE ARE EIGHT TIPS TO HELP YOUR SKIN MAKE THE TRANSITION FROM HOT AND HUMID TO COOL AND DRY, SEAMLESSLY:

1 Change the cleanser. In summer you were eager to get the oil out of the skin, fall calls for a gentler approach. You need to use something which doesn't dry the skin and calms all the irritations caused by the sun and heat. Try **Dermagram Ultra Calming Cleanser**. This cleanser is made in Switzerland and is formulated with precious ancient European herbal ingredients. It's ultra-gentle, calming and milky is totally skin-friendly and soothing. This cleanser protects the skin from free radical damage and helps regain its natural pH balance, just what you need at the beginning of fall.

2 Use a different toner. This advice follows the same logic as with a cleanser. You want something milder and more moisturizing. You can't pass up **Baszicare ROSEUS Floral Hydrating Toner**. This hydrating mist blends with a collection of luxurious botanical extracts and baszicare's Botanical Algorithmic System (BAS) to tone the skin and replenish moisture.

3 Try a different serum. Serum is such an important part of your daily skincare routine. In summer we usually tend to use lightweight products, fall calls for something else. There are two products you need to look at depending on your skin needs. Those of you who like using oils just can't miss **Dewdrop Skincare Brightening Saffron Elixir Serum**. It has it all: infused with a potent blend of 26 natural ingredients (just imagine!), individually sourced from different locations within India, in the areas they thrive best and filled with Pure Kashmir Saffron and vitamin rich superfoods. If you wonder what Saffron does for your skin, here is the answer - it reduces inflammation, hyperpigmentation and brightens skin. How is that for treating summer damage to your skin?

And here is the other serum option from the biggest clean beauty brand from Brazil - **Simple Organic Vitamin C Serum**. Adding a Vitamin C-infused skincare product in your fall skincare regimen can help soothe and repair sun-damaged summer skin. Being a potent antioxidant, it also helps improve skin tone, stimulate collagen production and reduce the appearance of wrinkles and fine lines. That's exactly what you need in fall.

4 Find a heavier moisturizer. To keep your skin moisturized during the colder days, swap your oil-free summer product for something richer. Check out **Anbiome incare Moisturizing cream**. "Plunge into eight ounces of water for your skin!" sounds really inviting.

High concentration of thermal spring water, antioxidants, and metabiotics to help maintain a daily level of skin hydration and nutrition. Thermal mineral water has a calming effect on the skin, and together with metabiotics, helps restore balance to the skin's microbiome. It's just what you need for your fall routine skincare.

5 Mask it up. Masks are not used every day and that's why lots of people forget how important they are in your skincare regimen. In fall look for masks which hydrate and repair the skin. Try out **LRS Skincare Brightening Turmeric Mask**. It's rich in minerals and gives strength & fades away dull, fatigued skin to restore a healthy, youthful appearance. Sea Buckthorn and Turmeric have powerful anti-inflammatory qualities that illuminate and calm the skin while Saffron Stem Cells and Zinc are antibacterial aiding in controlling breakouts. This masque leaves pores tighter and skin hydrated.

6 Don't forget about your body. Make sure you use the gel or soap which doesn't dry your skin. Herbal Intention **Soap Bars from Moonwater Soap & Candles** are filled with the goodness of sustainable botanical oils and high-quality essential oils. All bars are topped with crystals to make your beauty ritual into a self-caring act. There are three scent options to choose from: lavender, triple mint or citrus blends.

Fall is a time to start using body lotion every day. To prepare for dry cold months use the product that has oils which help to lock in moisture. Don't miss out on **Oyoma Beauty Whipped Shea Butter**. When you hear the word "shea butter" you imagine something hard, not with this lotion. The natural shea butter is whipped and blended with aloe vera extract and jojoba oils which makes it the softest most tender body lotion you can think of. It's perfect to moisturize and seal skin leaving it soft and supple.

7 Hands are also part of the body. Moisturizing and protection are two most important things as far as hand care is concerned. Don't overwash your hands and don't use excessively hot water. It's good to always have a hand cream in your purse. Here is a great option - **Nourishing Hand Cream from CHAOS ART BY RC**, a new, high-end EU-based brand, where abstract art meets unique products. The products exquisitely captivate the 3 key senses: smell, touch and sight. The hand creams contain almond and grape seed oils which nourish the skin and prevent it from drying out, glycerin which moisturizes the skin, vitamin E which acts as an antioxidant and silk proteins which leave the skin soft and silky. You will have 3 choices each with its unique look and scent. Go ahead and have fun choosing between Expressionism, Classic and Modern collections.

8 Feet need special care too. Barefoot summer is in the past as well as walking on the beach and wearing open shoes. That means your feet need as much attention as possible. We definitely have a recommendation for you - start with taking a relaxing bath with pure Icelandic bath salt from the luxurious brand - **SPA of ICELAND.**

Lighting a scented candle will turn your experience into that of a real spa. You have 3 options with three beautiful female names which also happen to be the names of the brand founder's granddaughters. **Fjóla Relaxing Scented Candle** (with Coconut, Amber, Musk & Vanilla notes), **Sara Energizing Scented Candle** (with Red Fruits, Freesia, Rose and Sandal wood) or **María Nourishing Scented Candle** (Verbena Lemon, YlangYlang , Almond & Vanilla), all three candles have 37 hours of burn time.

9 Take care of your hair. Your hair and scalp have been stressed out in the heat, sun, pools and ocean during the summer. It's high time you start helping your hair come back to life. Try out **The Malinis Factory OIL RX**. Oil RX is a potent Anti-itch blend of Peppermint, Mustard seed, Sesame oil, Basil, Argan oil and other essential oils to promote hair growth and length retention. It suits all types of hair.

So, what about the feet? Massage them with the real lava stone and finish your luxurious home spa experience with **SPA of ICELAND Moisturizing & softening Foot Cream** which will soothe and nourish dry and tired feet.
