Eminence Speaker manufactures high-quality audio components for professional and consumer applications with worldwide distribution. The company is known for unparalleled expertise in speaker technology, setting the industry standard for acoustic performance and innovation. Eminence has successfully worked with leading audio equipment manufacturers, including Yamaha, Bosch, QSC, Fender, Harman, Klipsch, Biamp, and Danley as well as industrial clients such as Federal Signal, Soundoff Signal, Technomad, and Bongiovi Aviation. Eminence Speaker, LLC is a Kentucky-based business with ISO 9001:2015 certification.

Company Data

Facility Location: Eminence, Kentucky

Certified Services: Eminence uses a Klippel Analyzer System to rigorously test and validate the performance of audio speakers. This process ensures that Eminence speakers meet the highest quality standards, offering accurate data on parameters like distortion, power handling, and mechanical behavior. Klippel testing stands as the benchmark in the industry, guaranteeing that Eminence consistently achieves excellence in both quality and reliability.

Years: 1998–Ongoing

“Technomad is a US based manufacturer or professional audio equipment, serving both the government and commercial markets. Technomad has been a customer of Eminence Loudspeakers for over 25 years. Eminence has provided both stock and custom loudspeaker transducers of the highest quality at excellent value over that time period. The in-house engineering staff has been invaluable for developing products to meet our exact requirements.”

—Rodger von Kries, Technomad
