

LUCKE Recycled Cycling wear catalogue

WE COMBINE BOTH

sublimation printing technique with recycled polyester
TO GET GREEN-ENVIRONMENTALLY FRIENDLY PRODUCT

“ECO FRIENDLY” PRINTING TECHNOLOGY SUBLIMATION

NO TOXINS

are used in the dye sublimation process
thus protecting workers and the environment

ZERO WASTE

as no dye will get into the water system

SAVING WATER

Inkjet jobs can consume as little as 20 litres of
water per kg of printed substrate - for cotton
this can be as much as 10,000 litres per kg

RECYCLED POLYESTER

**EVERY FIBRE COUNTS.
RECYCLED POLYESTER
SAVES RESOURCES
AND DECREASES EMISSIONS.**

A big part of the polyester fabrics
we use in dye sublimation
come from recycled plastic products
thus further protecting the environment

We are a team of outdoor enthusiasts on a mission to clean up the custom clothing industry.
Our vision is to create a world where the lifecycle of clothing is infinite and textile waste is a thing of the past.
