

CARE INSTRUCTIONS

- Pack Cleaning Instructions: -Remove yoke from pack by taking out frame sheet adjuster, break Velcro bond and remove yoke from the body of the bag. Un-thread webbing on waistbelt and remove from pack. (If applicable) -Open all zippered and drawstring pockets. Empty the pack of debris by turning upside-down and shaking. -Wash pack in a bath tub or large sink using warm water, a mild detergent, and a soft scrub (if needed). NOTE: Do not machine wash your pack. Use Hydrogen Peroxide to remove blood stains if needed. -Rinse the pack thoroughly. -Hang the clean pack to dry in the shade – do not dry your pack in direct sunlight. -Fire pack cleaning instructions only (except Hot Spot/Crewbag IA Frame): -Open every zippered and drawstring pocket as wide as possible. Empty the pack of all fireline debris by turning upside-down and shaking. - Using the frame sheet adjuster, break the Velcro® bond and remove the yoke from the body of the bag, shaking debris out. -Please take your pack to car wash and use power washer to thoroughly clean pack making sure to wash all pockets. -Hang the clean pack to dry in the shade – do not dry your pack in direct sunlight.

GENERAL PACK MAINTENANCE:

- Zipper maintenance: -Obtain a material-appropriate zipper lubricant. NOTE: Before purchasing, read the description closely to ensure it is suitable for the zipper material on your pack. i.e. metal, nylon, plastic. -On unzipped zippers, use compressed air to blow out each side. -Follow the application instructions provided by lubricant manufacturer.
- Fabric protection: -To enhance and maintain effective water repellency on your pack, we recommend using RUST-OLEUM® NeverWet® Fabric Water Repelling Spray – CLEAR. -Follow the application instructions provided by manufacturer.
