RING SIZE CHART

Before proceeding with the measurement of your ring, we suggest you to check if this ring size chart is printed properly.

Please measure with a ruler the sample below: it should measure 5 cm (1,968 inches)

If the ruler do not match the 5 cm sample on the page, please go back to your printer settings and select A4 page and "Actual Size" printing option. Do not select "Fit to page" printing option, since it can impact the proportion of the ring size chart.

HOW TO MEASURE A RING

If you have a ring that perfectly fits your finger, you can place it over the nearest sized circle of the Ring Size Chart.

Otherwise, you can use a ruler to measure the inside diameter of your ring and find the equivalent of one of the circles below.

If, for example, the interior diameter of your ring measures 16.56 mm, the equivalent sizing will be 52.

If the measurement you took results in between sizes, we recommend to select the largest of the two.
