Welcome to the Maverick Blind family! It’s our job to keep you out of sight and protected from the elements while you’re stalking The Big One. We hope your Maverick Blind hunting experience is an awesome one, and that you like it enough to tell your friends and family about us.

If following instructions isn’t your thing, watch our step-by-step assembly video: www.maverickblinds.com/setup-videos.html

You can assemble your Maverick Blind on your own, or invite a buddy to help out!

Tips to ensure your Maverick Blind is around for a long time:

- Store the blinds standing up to prevent warping.
- Protect your blind from the wind by staking it to the ground or bolting it to a platform through the flange.
- In areas that receive snow, prevent a winter roof collapse by standing a 2x4 board up in the middle of the blind from the floor to the point in the roof.
- When operating a firearm from inside the blind, be sure the barrel is outside the window for your safety and protection.
- If you have problems with your blind or questions, please contact us first at 920-965-8397, do not return it to the store.
Your Maverick Blind Kit Includes:

<table>
<thead>
<tr>
<th>Part</th>
<th>5-Shooter kit</th>
<th>6-Shooter kit</th>
</tr>
</thead>
<tbody>
<tr>
<td>Door panel with rain guard</td>
<td>1</td>
<td>1</td>
</tr>
<tr>
<td>Side panel</td>
<td>1</td>
<td>1</td>
</tr>
<tr>
<td>Horizontal plexiglass windows</td>
<td>3 (18” x 10”)</td>
<td>0</td>
</tr>
<tr>
<td>Vertical plexiglass windows</td>
<td>3 (10” x 18”)</td>
<td>8 (10” x 22”) &amp; 1 (10” x 18”)</td>
</tr>
<tr>
<td>Window hinge sets (hinges, machine screws/nuts)</td>
<td>9</td>
<td>9</td>

</tr>
<tr>
<td>Door seals (pre-cut)</td>
<td>5</td>
<td>5</td>
</tr>
</tbody>
</table>

You will also need a drill with a 1/4” bit and a 7/16” socket to assemble your Maverick Blind.

Step 1: Installing the windows

1. Install the hinges into the pre-drilled holes in each of the plexiglass windows.
   - *Do not* overtighten the hinges to the plexiglass; this can cause the window to crack. Tighten nuts by hand or with a socket.
   - *Do not* use Loctite.
2. From the inside of the blind, mount window hinges into the pre-drilled hole at the bottom of each blind window; hand-tighten the nuts.
   - The bolt heads should be inside the blind so the window opens fully.
3. Cut the window seals for the long windows to 54” and the short window to 44”; apply the seal to the outer edge of each window, gradually peeling the white backing off as you make your way around the window and applying some tension; stay within ⅛” of the window edge.

4. Still from inside the blind, use machine screws to mount three window clips per window into pre-drilled holes (no nut needed).

**Step 2: Connecting the two panels**

1. Slide the two panels of the blind together and make sure the rain guard at the top of the door panel completely covers the flange of the other panel.
   - Clamp the two panels together to secure them while you drill holes
2. Drill through the dimple marks in the top two corners and tighten the bolts by hand.
   - You may need to drill just below the dimple marks to make sure the rain guard won’t get in the way of tightening the bolts.
3. Continue drilling through the dimples down each side of the blind and tightening bolts by hand.
4. Finish by drilling through the dimples on the roof and installing bolts; then tighten all bolts once they’re all installed.
   - Do not overtighten the bolts.

**Step 3: Installing the door**

1. Cut the remaining two tabs out of the door.
2. Slide the pre-cut door seals on to the top, bottom, and sides of the door frame
   - You may have to push or tap the seals on.
   - You may need to trim the seal if it’s too long (a cutter or pruner will work)
3. Mount the hinge latch to the top right corner of the door and door frame using the pre-drilled holes.
   - To use this latch, you may have to lift the door slightly, but the latch is very important to the integrity of the door.

4. Install door handles using the middle set of pre-drilled holes; they go back-to-back on the outside and inside.

5. Install the door latches and handle using the pre-drilled holes.

** NOTE: To latch the door closed from the inside, simply reach your hand through the window and secure the latch. Or, you can order additional door latches at [www.maverickblinds.com](http://www.maverickblinds.com) to install inside the door. **
