

Carbon Reduction Plan Template

Supplier name: ...Field Doctor Limited.....

Publication date: ...12 Sept 2023.....

Commitment to achieving Net Zero

Field Doctor is committed to achieving Net Zero emissions by 2039.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

| Baseline Year: 2023 | |
|---|---|
| Additional Details relating to the Baseline Emissions calculations. | |
| We have based our baseline emission on financial / calendar year 2022 | |
| Baseline year emissions: | |
| EMISSIONS | TOTAL (tCO ₂ e) |
| Scope 1 | 0 |
| Scope 2 | 36 |
| Scope 3 (Included Sources) | 41 Upstream transportation – 8.8 Downstream transportation – 20.2 Employee Commuting – 1.9 Homeworking – 1.1 Material Use – 15 Water Supply – 0.1 |
| Total Emissions | 77 |

Current Emissions Reporting

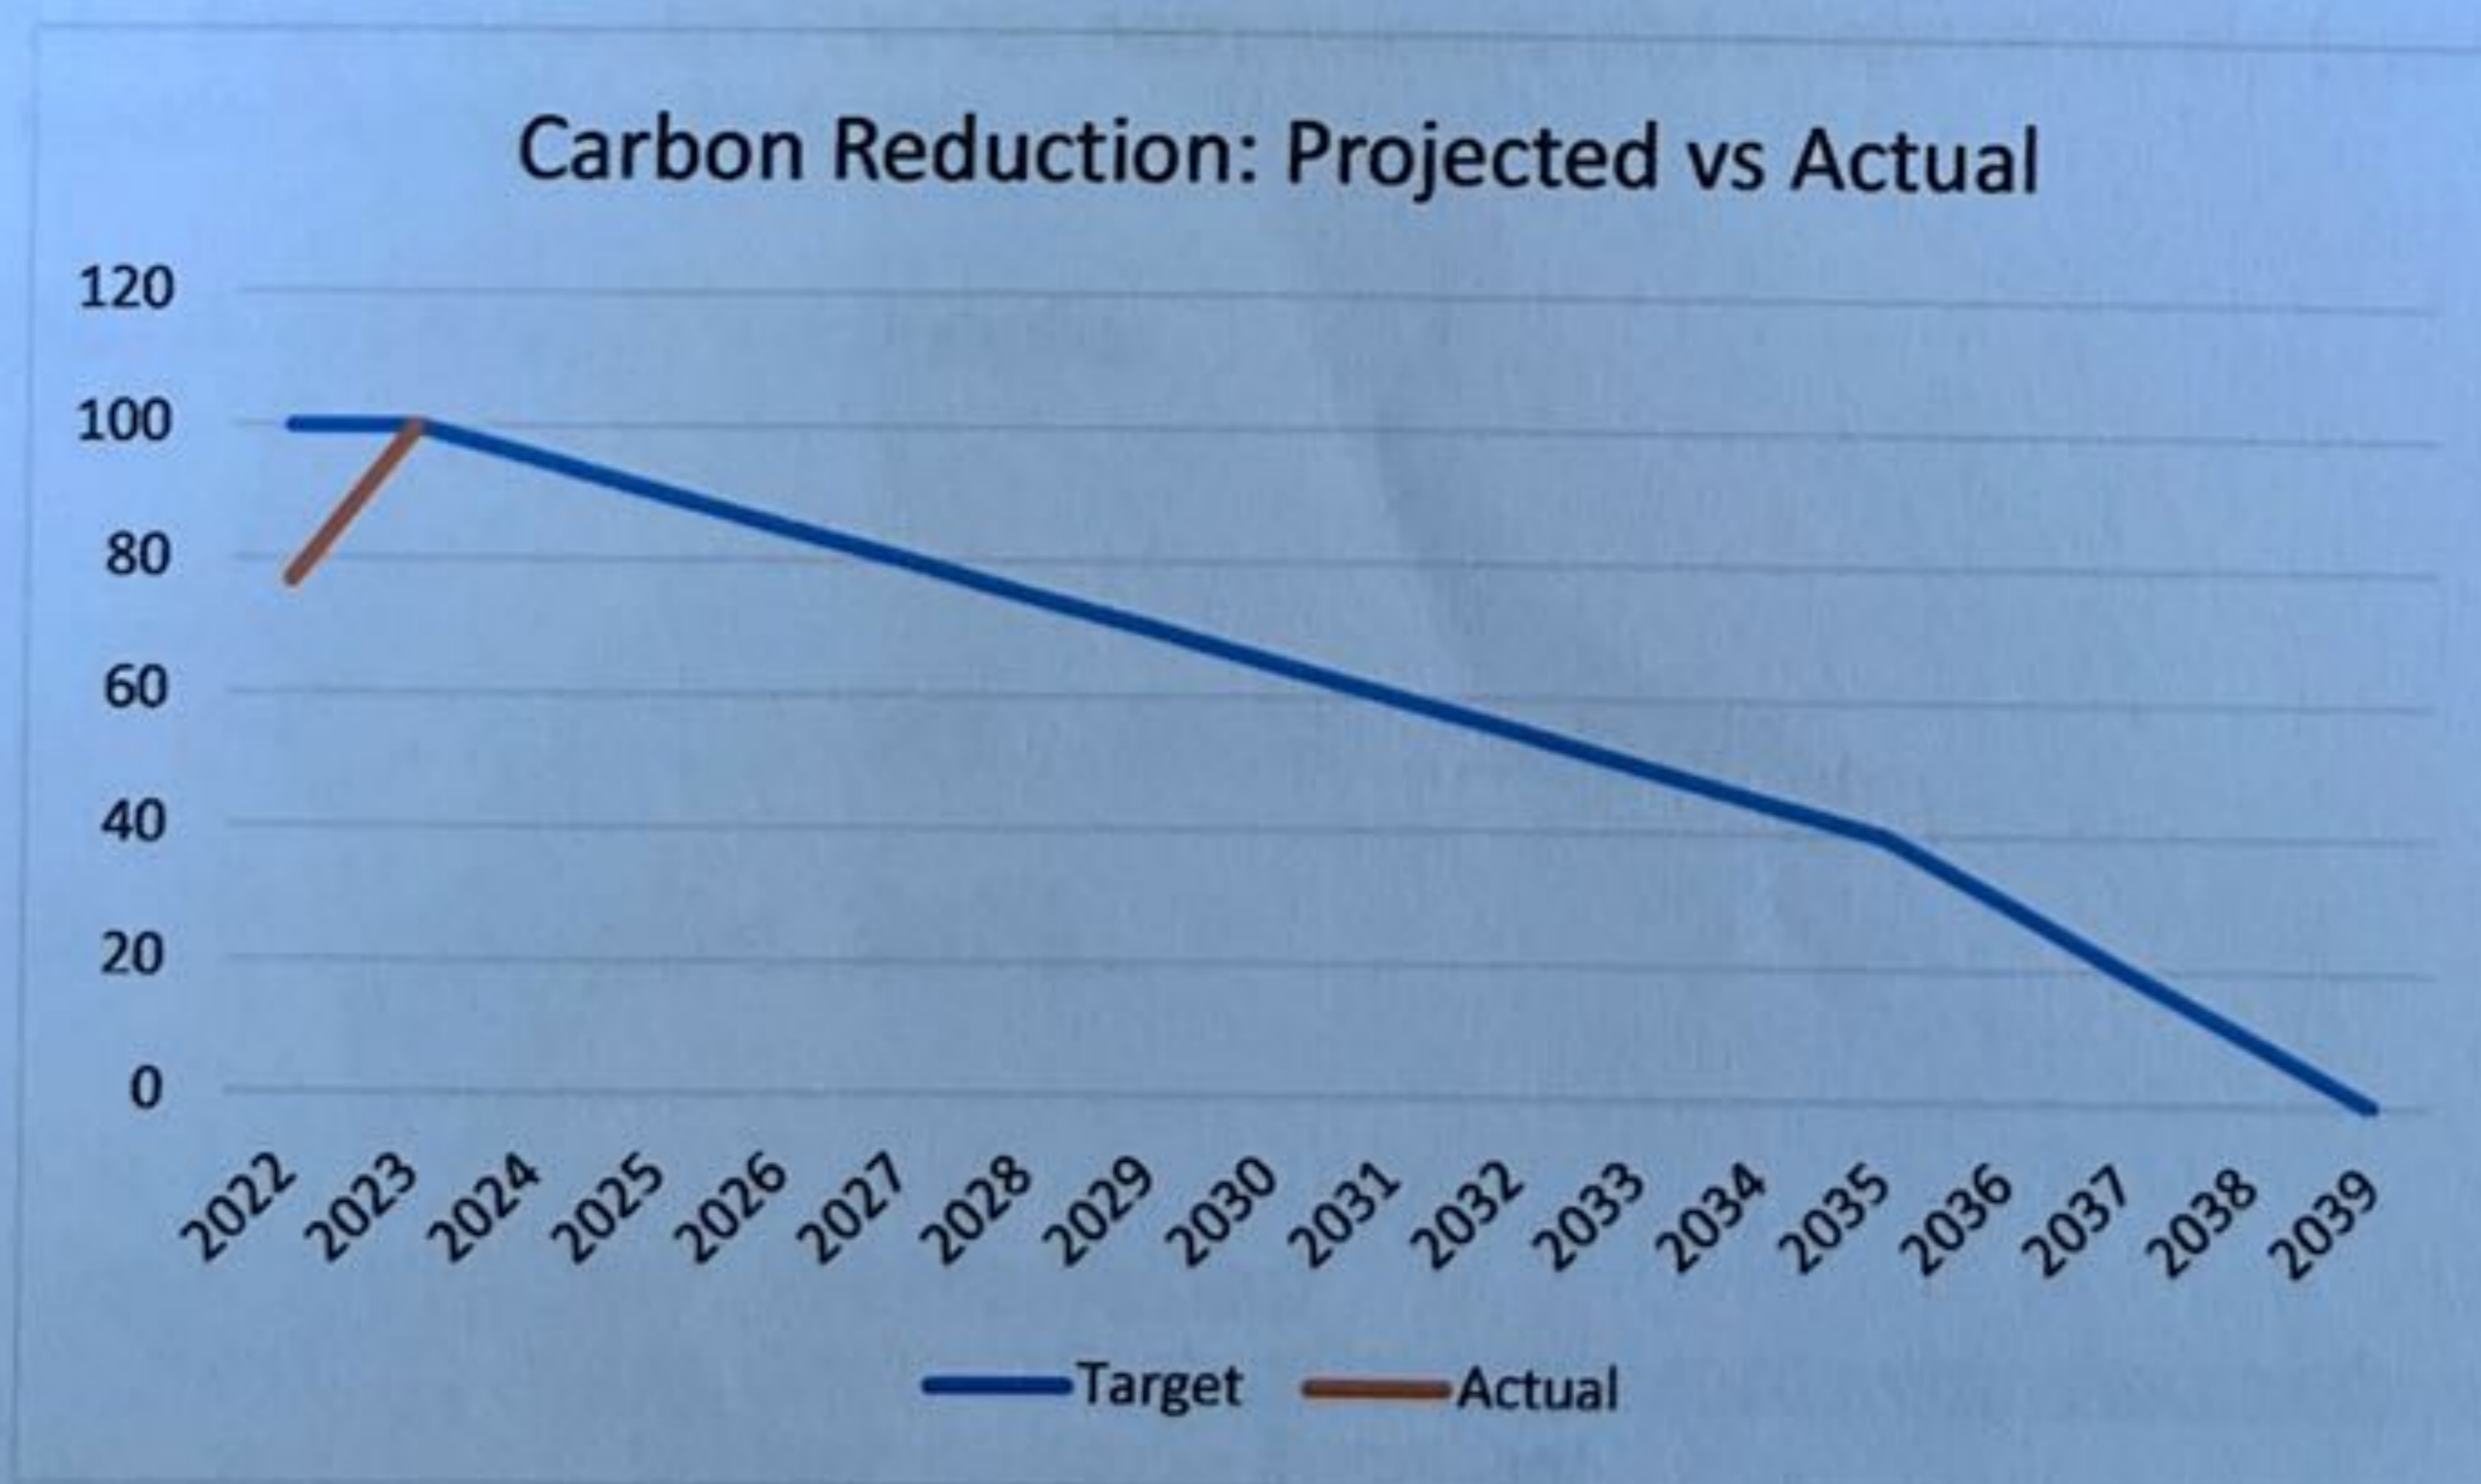

| Reporting Year: 2023 | |
|-------------------------------|---|
| EMISSIONS | TOTAL (tCO ₂ e) |
| Scope 1 | 0 |
| Scope 2 | 42 |
| Scope 3 (Included Sources) | 58 Upstream transportation – 8.8 Downstream transportation – 26.9 Employee Commuting – 1.9 Homeworking – 1.0 Material Use – 25.7 Water Supply – 0.1 |
| Total Emissions | 100 |

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets, we are tracking our use of energy, looking to source from green sources and will look at where we can source from renewable sources. We are looking at alternative and green delivery solutions – including electric vehicles – to reduce the carbon footprint. We are working on our materials usage including working on a returnable packaging solution to reduce material use. We are tracking our water supply and usage.

We project that carbon emissions will decrease over the next five years to 75% tCO₂e by 2028. This is a reduction of 25%

These targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

As an SME we are early in our journey on carbon reduction, but we work hard to maintain a focus on it – we have little if any food waste in our production, our energy usage is largely from green sources, the main one being 100% renewable sourced.

We have recently switch delivery partners, our national courier uses 40% less CO2 and our inside M25 courier uses 100% green energy and a fully electric fleet.

In the future we hope to implement further measures such as:

We are working with our partners to implement renewal fuel sources – inc solar, anaerobic digester for food waste and other concept.

We are working on a returnable box scheme to reduce our usage of cardboard and are working with our haulier as they implement a green fleet running on electricity.

We are tracking our energy and water usage and looking to implement efficiencies here.

Declaration and Sign Off

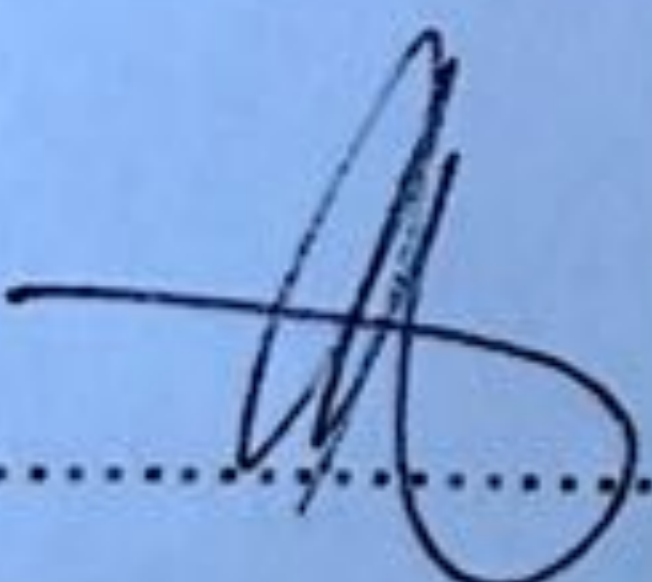

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard⁴ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting⁵.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard⁶.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

..... ALEX BROOKS DIRECTOR
