APRILAIRE MODEL 1820 DEHUMIDIFIER

AA-1820

Specifications

- Rated at 70ppd
- Designed to cover up to 2200 sqft
- Energy Star rated
- Five year warranty

The Aprilaire Model 1820 Dehumidifier is designed to dehumidify the air coming into the unit by passing the incoming air over an evaporator coil to drop the air temperature below the dew point of the air. Moisture is removed from the air and drained out of the unit to a common floor or waste drain. The air is then reheated in the condenser coil and exits the unit. Dehumidification occurs until the set point is reached, then shuts off until periodic sampling determines a need for operation.

APPLICATION

The Aprilaire Model 1820 Dehumidifier is the perfect solution for controlling humidity in crawlspaces, protecting against structural damage, pests and mold.

CIRCULATION

The Model 1820 can also be programmed to circulate the air within a crawlspace. Circulating the air evens out relative humidity levels and temperature in the space, eliminating variations in the environment.
