

YCS SEAM WELD

YCS SEAM WELD

YCS15125SW YCS 1.5"X125' SEAM WELD

The YCS Seam Weld is the best seaming product for our ***ground vapor barriers***, or any surface needing a permanent seal. You can use this product to attach foam board to our vapor barriers, which prevents the need for mechanical attachments.

Our seam weld is easy to use, has no odor, and replaces the need for hot welds.*

** This product should not be used with our felt backed 36 mil Vapor Barrier, nor is it a good solution for block or brick. Please refer to the YCS Wall Attachment Tape system when attaching vapor barriers to the foundation wall.*
