

Material Safety Data Sheet

Cucumber Glycerite

Utilization: raw material for cosmetic industry

Emergency: RO: numar national pentru cazuri de urgenta: 021 3183606 Institutul de Sanatate Publica Bucuresti. International emergency number: +49 180 2273-112

Classification of substance:

Not classified by rule (CE) 1272/2008

Not classified by directive 67/548/CEE or directive 1999/45/CE

Indication on hazards for human an environment

This product is not to be labeled, according to the process of calculation of the "General directive of classification for preparation of the CE", in the last valid version.

Classification system:

The classification corresponds to the current lists EEC and is completed by pulled indications of specialized publications and indications supplied by the suppliers of components entering the composition of the substance.

Marking according to the EEC directives:

The usual measures of caution must be observed in case of manipulation of chemicals. The product is not identified according to the directives of the European Community / national respective laws 2008/58/CE (30th ATP); 2009/2CE (31th ATP) and 2006/8/CE.

Results of evaluations PBT and vPvB: PBT : not applicable, vPvB : not applicable

Main components:	CAS number	EINECS number	%
Glycerin	56-81-5	200-289-5	> 34.7%
Aqua	7732-18-5	231-791-2	> 34.7%
Cucumis sativus fruit extract	89998-01-6	289-738-4	< 30%

Eye contact: Irrigate with water during 10 minutes

Skin contact: in general the product is not irritant for skin. If irritation, drench with water and soap

Accidental ingestion: rinse the mouth, no undesirable effect

Inhalation: breathe fresh air

Material Safety Data Sheet

Material to be used: pulverized water, CO₂, powder

Dangerous combustion product: production of acroleine if high temperature

Protection of persons: use an appropriate respiratory mask in case of fire.

6. Accidental release measures:

Individual measures: not necessary

Environmental measures: dilute with a lot of water. Avoid any pollution of surface and ground waters

Product elimination: Collect liquids by means of a product absorbing (sand, neutralizing of acid, sawdust)

7. Handling and Storage

Handling: Respect the good practices of hygiene, Do not smoke, eat or drink in the manipulation area.

Storage: store in dry and cool place. Keep the drums well closed in a well aired place.

8. Exposure Controls and Personal Protection

Control parameters: Components presenting values threshold to be watched by post of work:

CAS : 56-81-5 GLYCEROL (25-50%) VME (France) 10 mg/m³

Respiratory protection: No special measure required.

Hand protection: Protective gloves recommended.

Eye protection: Avoid contact with eyes. Use eye protectors designed to protect against liquid splashes
Before handling, wear safety goggles in accordance with standard EN166.

Physical protection: Use individual protective equipment. Respect the general security rules for the use of chemical products.

9. Physical and Chemical Properties

Appearance:	liquid
Colour:	light yellow
Odour:	typical
Flash point:	> +95°C
Density at 20°C:	1.070 - 1.160 g/cm ³
pH value:	4,0 - 7,0
Solubility(ies):	miscible with water; soluble in alcohol
Danger of explosion:	no danger
Auto flammable point:	not applicable
Auto-inflammation:	not applicable

10. Stability and Reactivity

The product is stable when stored in good conditions: avoid high temperature

Possibilities of dangerous reactions: no dangerous reaction known

Conditions to be avoided: No other available important information

Incompatible materials: No other available important information

Dangerous product of decomposition due to the presence of glycerin: production of acroleine if high temperature

11. Toxicological Information

Information not available on the substance.

Information on glycerin

Acute toxicity DL50 oral (rat): 27200 mg/kg. DL50 oral (mouse): 23000 mg/kg. DL 50 skin (rabbit): > 18700 mg/kg

Skin irritation: not supposed irritant. Eye irritation: not supposed irritant.

Toxicity at repeated doses:

Oral : NOAEL (rat) : 10 000 mg /Kg

Inhalation : NOAEC (rat) : 165 mg /m3 (local irritant effects of respiratory tracts)

NOAEC (rat): 662 mg /m3 (systemic irritant effects)

Other toxicologic information : Natural substance

12. Ecological Information

Do not leave the product, not diluted or in great quantities, penetrate into the groundwater, into waters or into pipes

Information on glycerin:

Biodegradation in water: Easily biodegradable

Bioaccumulation: Low potential of bioaccumulation

Ecotoxicity for aquatic organisms: PNEC aqua: 780 mg /L: low risk for aquatic environment

Toxicity for the fishes: CL50 (24H) : >5000 mg /L (Carassius auratus)

Toxicity for aquatic invertebrates: CE50 (24h) : >10 000 mg /L (Daphnia magna)

Toxicity for algae: CE50 (96H): 77 712 mg /L (value obtained by calculation)

Toxicity for microorganisms:

NOEC (16H): >10 000 mg /L (Pseudomonas putida)

NOEC (20H): >10 000 mg /L (Uronema parduzci)

NOEC (48H): >10 000 mg /L (Chlomonas paramaecium)

NOEC (72H): 3 200 mg /L (Entosiphon sulcatum)

13. Disposal Considerations

Recommendation: In accordance with local environmental laws. Avoid disposing into drainage systems and into the environment.

14. Transport Information

UN no: not applicable

Road (ADR/RID): No dangerous for transport.

Air (IATA/ICAO): No dangerous for transport.

Sea (IMDG): No dangerous for transport.

15. Additional Regulatory Information

Not submitted to labeling in accordance to directive 67/548/CE and rule 272/2008/CE.

Chemical safety assessment: not available data

Disclaimer

This material safety data sheet does not constitute a guarantee of the properties of the product and is not a contractual legal report. The information is given in good faith on the basis of our best knowledge of the product at the indicated time. However, we cannot accept responsibility or liability for any consequences arising from its use, no warranty for correctness and completeness is given. We caution the users against the incurred possible risks when the product is used at other ends than the use for which it was initially planned. It is the user's responsibility during handling, storage and product use to consult the main regulatory texts in force regarding workers and environment protection.
