

## Introducing Maxi.

Maxi is chlorinated detergent used for cleaning laundries, toilets, and bathrooms. This powerful, concentrated solution, has been created by Cleaner Future to deodorise and disinfect with a high foam and refreshing fragrance. When you need Maxi, let it do the work for you.

CONTAINS: Sodium Hypochlorite

## Key Benefits

- Sterilising deodoriser
- Can be used across multiple settings for an infection prevention program
- Economical all in one bleach and sanitiser

## Sustainability

Cleaner Future aims to construct formulations that efficiently solubilize and disperse fats, oils and dirt, thereby minimizing the amount of cleaning product required to achieve a complete clean. This lightens our load on our sewer system and increases the rate and degree of biodegradation. We endeavour to use plant-based surfactants that originate from cropping. Where possible, we replace petrochemical solvents with plant-based oil seeds.

## Directions of Use

Foaming unit: 1 part chlor-det 15 parts water.

Pressure washing: 1 part chlor-det to 15 parts water.

Manual cleaning: pour onto surface neat, allow chlor-det to penetrate before rinsing off.
