

ISSUE DATE: 22/05/2020 Sanitiser Spray Page 1 of 6

1. Identification

GHS Product identifier Boost Sanitiser Spray
Company Name Cleaner Future Pty Ltd

Address U 9/8 Garden Road, Clayton VIC 3168

Telephone (03) 9850 3055

Contact info@cleanerfuture.com.au

Recommended use Sanitising solution for kitchen implements and hard surfaces

Other Names BOOST-102 (Manufacturer's supply code)

Emergency Contact #13 11 26

2. Hazard Identification

GHS classification of Flammable liquid 3

the substance/mixture Skin irritation Category 2
Eye irritation Category 2A

Signal Word (s) DANGER

Hazard Statement (s) H226 Flammable liquid and vapour

H315 + H320 Causes skin and eye irritation

Risk Phrases R11 Highly Flammable.

Pictogram (s) GHS02

Precautionary statement - P234 Keep only in original container.

Prevention P210 Keep away from heat/sparks/open flames/hot surfaces. - No smoking.

P233 Keep container tightly closed.

P240 Ground/bond container and receiving equipment.

 ${\tt P241~Use~explosion-proof~electrical/~ventilating/~lighting/~equipment}.$

P242 Use only non-sparking tools.

P243 Take precautionary measures against static discharge.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

Response P303 + P361 + P353 IF ON SKIN (or hair): Remove/ Take off immediately all contaminated

clothing. Rinse skin with water/ shower.

P337 + P313 If eye irritation persists: Get medical attention.

P305 + P351 + P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical attention.

P370 + P378 In case of fire: Use dry sand, dry chemical or alcohol-resistant foam for extinction.

Storage P405 +P403 + P235 Store locked up. Store in a well-ventilated place. Keep cool.

Disposal P501 Dispose of contents/ container to an approved waste disposal plant

3. Composition/information on ingredients

Chemical Characterization Alcoholic solution

<u>Hazardous ingredients</u> <u>Name</u> <u>CAS no.</u> <u>Proportion</u>

Ethyl alcohol 64-17-5 <70 %

Quaternary Ammonium 107028-70-6 <0.1%

Compounds

Other non-hazardous ingredients up to 100%

ISSUE DATE: 22/05/2020 Sanitiser Spray Page 2 of 6

4. First-aid measures

Ingestion: Do NOT induce vomiting. Never give anything by mouth to an unconscious person. Rinse mouth with water.

Consult a physician.

Skin: Wash off with soap and plenty of water. Consult a physician.

Eye contact Rinse thoroughly with plenty of water for at least 15 minutes and consult a physician.

Inhalation If breathed in, move person into fresh air. If not breathing, give artificial respiration. Consult a physician.

First Aid Facilities Maintain eyewash fountain and safety shower in work area. **Advice to Doctor** Treat symptomatically. Consult Poisons Information Centre

Other Information For advice, contact the National Poisons Information Centre (Phone Australia 13 11 26 and New Zealand 0800

764 766) or a doctor.

5. Fire-fighting measures

Suitable extinguishing

Use extinguishing media most appropriate for the surrounding fire.

Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

If safe to do so, move undamaged containers from the fire area. Cool containers with flooding quantities

of water until well after the fire is out.

Specific hazards arising from the chemical

Highly Flammable. Vapours are heavier than air and may form explosive mixtures with air. Contact with an ignition source may cause flashback along the vapour trail. Contact with oxidising agents may result in fire and

the emission of carbon monoxide, carbon dioxide and other products of combustion.

Precautions in connection

with fire

media

Wear SCBA and chemical splash suit. Fully encapsulating, gas-tight suits should be worn for maximum

protection. Structural firefighter's uniform is NOT effective for these materials.

6. Accidental release measures

Personal Precautions Use personal protective equipment. Avoid breathing vapours, mist or gas. Ensure adequate ventilation.

Remove all sources of ignition. Evacuate personnel to safe areas. Beware of vapours accumulating to form explosive concentrations. Vapours can accumulate in low areas. For personal protection see section 8.

Personal Protection Wear protective clothing specified for normal operations (see Section 8)

Clean-up Methods-Small Spillages Contain spillage, and then collect with an electrically protected vacuum cleaner or by wet-brushing and

place in container for disposal according to local regulations (see section 13).

Clean-up Methods-Large Spillages Seek expert advice on handling and disposal.

Environmental Precautions Prevent further leakage or spillage if safe to do so. Do not let product enter drains.

7. Handling and storage

Precautions for Safe

Avoid contact with skin and eyes. Avoid inhalation of vapour or mist.

Handling

Keep away from sources of ignition - No smoking. Take measures to prevent the buildup of electrostatic

charge.

Conditions for safe storage

Store in cool place. Keep container tightly closed in a dry and well-ventilated place. Containers which are

opened must be carefully resealed and kept upright to prevent leakage. Keep in fireproof place.

Incompatible products Strong bases. Strong acids.

Incompatible materials Alkali metals, Ammonia, Oxidizing agents, Peroxides

Packaging materials SUITABLE MATERIAL: stainless steel, aluminum, iron, copper, nickel, synthetic material and glass.

ISSUE DATE: 22/05/2020 Sanitiser Spray Page 3 of 6

8. Exposure controls/personal protection

Occupational exposure limit

values

Controls

<u>STEL</u> <u>TWA</u>

Name mg/m3 ppm mg/m3 ppm Footnote

Ethyl alcohol 1880 1000

Other exposure The exposure value at the TWA is the average airborne concentration of a

Information particular substance when calculated over a normal 8 hour working day for a 5-day working week.

Appropriate engineering In industrial situations maintain the concentrations values below the TWA. This may be achieved by

process modification, use of local exhaust ventilation, capturing substances at the source, or other methods.

method

Personal Protective Final choice of personal protective equipment will depend on individual circumstances and/or according

Equipment to risk assessments undertaken.

Respiratory Protection Where ventilation is not adequate, respiratory protection may be required. Avoid breathing dust, vapours

or mists. Respiratory protection should comply with AS 1716 - Respiratory Protective Devices and be selected in accordance with AS 1715 - Selection, Use and Maintenance of Respiratory Protective Devices. Filter capacity and respirator type depends on exposure levels. In event of emergency or planned entry into unknown concentrations a positive pressure, full-face piece SCBA should be used. If respiratory protection is required; institute a complete respiratory protection program including selection,

fit testing, training, maintenance and inspection.

Eye Protection The use of a face shield, chemical goggles or safety glasses with side shield protection as appropriate.

Must comply with Australian Standards AS 1337 and be selected and used in accordance with AS 1336.

Hand Protection Avoid skin contact when removing gloves from hands, do not touch the gloves outer surface. Dispose of

gloves as hazardous waste.

Hand protection should comply with AS 2161, Occupational protective gloves - Selection, use and

maintenance. Recommendation: Nitrile rubber gloves.

Footwear Safety boots in industrial situations is advisory, foot protection should comply with AS 2210,

Occupational protective footwear - Guide to selection, care and use.

Body Protection Clean clothing or protective clothing should be worn, preferably with and apron. Clothing for protection

against chemicals should comply with AS 3765 Clothing for Protection Against Hazardous Chemicals.

Hygiene Measures Do not eat, drink or smoke in work areas. Wash hands thoroughly after handling this material. Maintain

good housekeeping.

9. Physical and chemical properties

Form Liquid Appearance Colourless

Odour Alcohol odour (sweet)

Melting Point- 115 °CBoiling Point78 - 87 °CFlash point25 °C - closed cupVapour Pressure44mmHg @ 20°C

Solubility Soluble in water. Soluble in ether. Soluble in acetone. Soluble in chloroform. Soluble in oils/fats. Soluble in

methanol. Soluble in acids.

Specific Gravity 0.8 @ 20 °C pH Not available

Odour Threshold 100 ppm - 188 mg/m³ Flammability Highly flammable Molecular Weight 46.07 g/mol

ISSUE DATE: 22/05/2020 Sanitiser Spray Page 4 of 6

10. Stability and reactivity

Chemical Stability Stable under normal use conditions. Hygroscopic

Conditions to Avoid Heat, flames and sparks. Extremes of temperature and direct sunlight. Incompatibles.

Incompatible Materials Alkali metals, Ammonia, Oxidizing agents, Peroxides

Hazardous Decomposition

Hazardous Polymerization

products

Carbon monoxide. Carbon dioxide. May release flammable gases.

Possibility of

Not established.

hazardous reactions

Will not occur.

11. Toxicological Information

Acute toxicity Harmful if swallowed.

Ethanol (64-17-5) LD50 oral rat 10740 mg/kg (Rat; Experimental value)

LD50 dermal rabbit > 16000 mg/kg (Rabbit)

Inhalation Inhalation at levels at or exceeding the Occupational Exposure limits or any deliberate ingestion is known to lead

to health effects which may be evident in them, or lead to impaired functioning and consequent safety risks in the industrial setting. A blood alcohol level in excess of 0.05g\100ml is regarded as likely to impair functioning for

tasks such as operating machinery.

Vapour may be irritating to mucous membranes and respiratory tract. Inhalation of the vapour may result in drunkenness, (see effects of swallowing above) or headache, nausea, in coordination, narcosis (sleepiness) and vomiting. Early signs or symptoms may occur at airborne levels of 1000 to 5000 ppm. Ongoing or repeated exposures at high concentrations may cause central nervous symptoms similar to 'swallowed' above. Deliberate

inhalation of the vapour is a known occupational risk.

Skin Contact with skin may result in slight irritation and redness. Prolonged or repeated contact and heavy skin

contamination may cause skin drying and cracking and/or dermatitis with redness, itching, and swelling. This may

lead to possible secondary infection.

Eye Vapours may irritate the eyes. Symptoms may include redness, excessive tearing, and stinging, swelling and

blurred vision.

Ingestion Swallowing can cause drunkenness and any health effects caused by the total intake of ethanol containing

products is a known occupational risk where as little as 50 -100ml intake in a shift in a 70kg worker may cause inebriation to the point where safety is impaired. Effects of a small intake may include excitation, euphoria, headache, dizziness, drowsiness, blurred vision, and fatigue. Drinking a large amount may lead to severe acute intoxication, tremors, convulsions, loss of consciousness, coma, respiratory arrest and death. Aspiration into

lungs may cause pneumonitis.

Chronic Effects Long term exposure by swallowing or repeated exposures in excess of the occupational exposure limits may

cause degenerative changes in the liver, kidneys, gastrointestinal tract and heart muscle. Persons with preexisting liver impairment, skin and respiratory disorders may be at an increased risk. Ethanol may cause adverse reproductive effects. Absorption of some drugs may be affected causing adverse health effects. Ingestion by pregnant women may cause serious effects in their newborn babies called 'foetal alcohol syndrome'. Ethanol is not listed as a carcinogen by the Australian Safety and Compensation Commission (formerly NOHSC). The International Agency for Research on Cancer (IARC) has evaluated ethanol as a human carcinogen on the basis of effects of drinking alcoholic beverages, but there is no known carcinogenic risk from occupational exposures. There is extensive toxicological and epidemiological information on the health effects of ingesting alcoholic drinks containing ethanol. Any occupational exposures will add to overall exposures from ingestion of alcoholic

drinks any health effects that result from such exposures.

ISSUE DATE: 22/05/2020 Sanitiser Spray Page 5 of 6

Carcinogenicity Mouse – Oral. Tumorigenic: Equivocal tumorigenic agent by RTECS criteria. Liver: Tumors. Blood: Lymphomas

including Hodgkin's disease.

IARC: No component of this product present at levels greater than or equal to 0.1% is identified as

probable, possible or confirmed human carcinogen by IARC.

Reproductive toxicity Reproductive toxicity - Human - female - Oral

Effects on Newborn: Apgar score (human only). Effects on Newborn: Other neonatal measures or effects.

Effects on Newborn Drug dependence.

12. Ecological information

degradability

Ecotoxicity No data available.

Persistence and No data available.

Acute Toxicity Not available for this product. However for related entity Ethanol (64-17-5):

LC50 fishes 1 14200 mg/l (96 h; Pimephales promelas; Nominal concentration)

EC50 Daphnia 1 9300 mg/l (48 h; Daphnia magna)

LC50 fish 2 13000 mg/l 96 h; Salmo gairdneri (Oncorhynchus mykiss)

EC50 Daphnia 2 10800 mg/l (24 h; Daphnia magna)

Threshold limit other aquatic organisms 1:65 mg/l (72 h; Protozoa)

Threshold limit algae 1: 1450 mg/l (192 h; Microcystis aeruginosa; Growth rate)
Threshold limit algae 2: 5000 mg/l (168 h; Scenedesmus quadricauda; Growth rate)

13. Disposal considerations

Disposal Considerations Avoid release of product to the environment. Product and containers not suitable for landfill. Recycle/reuse

empty containers where possible. Stored empty containers are to be treated as hazardous waste. Remove waste in accordance with local and/or national regulations by an authorized company. Hazardous waste shall not be

mixed together with other waste.

14. Transport information

U.N. Number 1987

UN proper shipping name Alcohols, n.o.s.

Transport hazard class(es) Class 3 Flammable liquid

Hazchem Code 2Y[E]
Packing Group

15. Regulatory information

Regulatory Information Listed in the Australian Inventory of Chemical Substances (AICS).

Poisons Schedule S6

16. Other Information
