PRODUCT CARE

Metal

For metal care, use a dry or lightly dampened soft cloth. For heavily soiled metal, clean with mild soap and water. If using a damp cloth, dry with a new cloth immediately after.

Important things to remember:

- For best results, use a microfiber cloth
- Clean metal frequently. Soiled metal may become corroded.
- Do not use glass cleaner to clean metal.

Stainless Steel

To remove surface stains, use stainless steel cleaner or glass cleaner with no ammonia. Wipe the stainless-steel surface clean with a cloth dampened with the solution then use a clean cloth to dry the surface completely.

Important things to remember:

- Always use a soft, dry cloth to finish and dry stainless steel
- Clean stainless-steel at least once every 60 days.
- Keep the bases of chrome polish/finished products away from pets as their bodily fluids may cause damage.
