# PRODUCT CARE

## Acrylic

Use a micro-fiber type of cloth. Avoid ammonia-based products, like Windex or other home glass cleaners, because they contain harmful chemicals that will damage the surface leaving it cloudy looking. Soapy water is the safest and most effective cleaning solution for acrylic.

## Stainless Steel

To remove surface stains, use stainless steel cleaner or glass cleaner with no ammonia. Wipe the stainless-steel surface clean with a cloth dampened with the solution then use a clean cloth to dry the surface completely. Important things to remember:

- Always use a soft, dry cloth to finish and dry stainless steel
- Clean stainless-steel at least once every 60 days.
- Keep the bases of chrome polish/finished products away from pets as their bodily fluids may cause damage.
